MID SEMESTER EXAMINATION, 2021

BUSINESS ENVIRONMENT

Time : 1½ Hours

Maximum Marks : 50

Note : (i) Answer all the questions by choosing any *one* of the sub-questions.

(ii) Each question carries 10 marks.

1. (a) Define the term business environment and explain the relevance for the study of business environment for managers.

10 Marks (CO1)

OR

(b) What is Cultural Environment ? What is the impact of cultural dimensions on business ? 10 Marks (CO2)

P. T. O.

28

2. (a) Illustrate and explain the difference between Micro and Macro business environment. 10 Marks (CO2)

OR

(b) Analyze the importance for the study of business environment for managers.

10 Marks (CO3)

3. (a) What is an Economic System ? What are the main pillars of an economic system ?

10 Marks (CO5)

OR

(b) Highlight the advantages and disadvantages of Capitalism over socialism economic system.

10 Marks (CO3)

4. (a) Highlight the few initiatives taken by the government to augment the economic infrastructure in India. 10 Marks (CO2)

OR

(b) Define the importance of various tools used for analysis of Business Environment. 10 Marks (CO4)

5. (a) What is Economic Planning and what are the objectives of Economic Planning in India ? 10 Marks (CO1)

OR

(b) Discuss the role of technology in economic development. 10 Marks (CO3)

MID SEMESTER EXAMINATION, 2021

MANAGEMENT ACCOUNTING

Time : 1½ Hours

Maximum Marks : 50

Note : (i) Answer all the questions by choosing any *one* of the sub-questions.

(ii) Each question carries 10 marks.

1. (a) Explain the features of management accounting. What are the tools which make it useful for the management ?

10 Marks (CO1)

OR

(b) What is your understanding about elements of cost and types of cost ? Also discuss the *three* types of cost with suitable examples. 10 Marks (CO1)

54

P. T. O.

2. (a) The following information is obtained from the records of M Co. Ltd. :

10 Marks (CO3)

	₹
Sales (100000 units)	1,00,000
Variable cost	60,000
Fixed cost	30,000

(i) Find P/V ratio, Break-even point and Margin of safety at this level.

(ii) Calculate the effect of the following :

(I) 20% increase in selling price

(II) 5% decrease in sales volume

(III) 10% decrease in fixed cost

(IV) 10% decrease in variable cost

OR

(b) Gupta Company places before you the following trading results :

	Sales (₹)	Profit (₹)
2017	2,00,000	10,000
2018	1,60,000	2,000

Find out the following : 10 Marks (CO3)

(i) P/V Ratio

(ii) Fixed Cost

(iii) Break-even Point

(iv) Variable cost during two years

(v) Margin of safety at a profit of ₹ 2,000.

3. (a) Write short notes on the following :

10 Marks (CO3)

(i) Break-even point

(ii) Margin of safety

(iii) Contribution

(iv) Profit/Volume ratio

OR

(b) What do you mean by Break-even Analysis ? Discuss its assumptions and limitations. 10 Marks (CO3)

4. (a) A company produces 1000 articles for home consumption at the following costs :

10 Marks (CO3)

	₹
Material	40,000
Wages	36,000
Fixed factory overheads	12,000

Variable factory overheads	20,000
Administration overheads (fixed)	18,000
Fixed selling overheads	10,000
Variable selling overheads	16,000

The foreign market for this product can, however, consume additional 4000 units if the selling price is reduced to ₹ 125 per article from the present selling price of ₹ 155 per article. Is the foreign market worth trying ?

OR

(b) The Texomat (Pvt.) Ltd. has been manufacturing track suits for anthletes. Currently its output is around 70% of its rated capacity of 19000 units per annum. One exporter has approved the sample and has offered to buy 5000 units at a special price of ₹ 150 per suit. At present the company has been selling the track suit @

₹ 210. The standard cost per unit is as under :

Cloth and other material	₹ 82.00
Labour	₹ 25.00
Fixed cost	₹ 42.00
Administrative variable cost	₹ 11.00
Total cost	₹ 160.00

Should the company accept the offer ? What would be your advice if the exporter offers to buy 10000 units instead of 5000 units ? 10 Marks (CO2)

5. (a) Prepare the cost sheet to show total cost of production and cost per unit of goods manufactured by a company for the month of July 2020. Also find out the cost of sales : 10 Marks (CO2)

	₹
Stock of raw material as on 1st July	3,000
Raw material purchased	28,000

Stock of raw material as on 31st July	4,500
Manufacturing Wages	7,000
Depreciation of Plant	1,500
Loss on sale of a part of plant	300
Factory rent and taxes	3,000
Office rent	500
General expenses	400
Discount on sales	300
Advertisement exp. to be fully charged	600
Income Tax paid	2,000

The number of units produced during the month of July 2020 was 3000. The stock of finished goods was 200 and 400 units on 1st July and 31st July respectively. The total cost of units in hand on 1 July was ₹ 2,800. All these have been sold during the month.

OR

(b) From the following particulars, prepare a cost sheet showing the cost per item and

total cost per ton for the period ended 31st March, 2020 :

	₹
Raw material	33,000
Productive wages	35,000
Unproductive wages	10,500
Factory rent and taxes	7,500
Factory lighting	2,200
Factory heating	1,500
Motor power	4,400
Haulage	3,000
Director's fee—works	1,000
Factory cleaning	500
Sundry office expenses	200
Factory stationery	750
Office stationery	900
Loose tools written-off	600
Bank charges	50
Director's fees—office	2,000
Rent and Taxes (office)	500
Water supply	1,200

Factory Insurance	1,100
Office Insurance	500
Legal expenses	400
Direct expenses	3,000
Rent of warehouse	300
Depreciation of plant	2,000
Depreciation of building	1,000
Depreciation on van	200
Bad debts	100
Advertising	300
Sales deptt. salary	1,500
Upkeep of delivery van	700
Commission on sales	1,500

Note : The total output for the period has been 15000 tons. 10 Marks (CO2)

B. B. A. (THIRD SEMESTER)
MID SEMESTER EXAMINATION, 2021

STATISTICS FOR MANAGEMENT

Time : 1½ Hours

Maximum Marks : 50

Note : (i) All questions are compulsory.

(ii) Answer any *one* sub-questions between (a) and (b) in each main question.

(iii) Each question carries 10 marks.

1. (a) Define statistics and discuss its applications in managerial decision-making. 10 Marks (CO1, & CO2)

OR

(b) Explain the general principles of classification of data for forming a frequency distribution.

10 Marks (CO1 & CO2)

92

P. T. O.

2. (a) Define the terms grouped data, class interval, class limits, inclusive and exclusive series. 10 Marks (CO2 & CO3)

OR

(b) Prepare a 'less than' and 'more than' frequency distribution from the following data : 10 Marks (CO2 & CO3)

Marks obtained	No. of Students
30—40	8
40—50	12
50—60	20
60—70	25
70—80	18
80—90	17

3. (a) "The arithmetic mean is the best among all the averages." Give reasons to substantiate the statement. 10 Marks (CO3)

OR

(b) Calculate arithmetic mean from the following data : 10 Marks (CO3)

Class	Frequency
20—25	8
25—30	10
30—35	12
35—40	20
40—45	11
45—50	4
50—55	5

4. (a) 100 salesmen employed by a company, have booked the following number of orders : 10 Marks (CO2)

No. of orders booked	No. of Salesmen
10—20	4
20—30	12
30—40	25
40—50	30
50—60	15
60—70	8
70—80	6

Calculate median of the above data.

OR

(b) Calculate Karl Pearson's coefficient of correlation from the following data :

10 Marks (CO1 & CO3)

Overhead expenses	Cost
80	15
90	15
100	16
110	19
120	17
130	18
140	16
150	18
160	19

OR

(b) Calculate S.D. of the following discrete frequency distribution : 10 Marks (CO2)

Size (X)	Frequency
4	6
5	12
6	15
7	28
8	20
9	14
10	5

5. (a) The following table shows the results of an analysis relating to the prices of two shares X and Y :

Share	Mean	S.D.
X	45.00	9.00
Y	62.50	18.75

Which of the two shares X or Y, have more variability in prices ?

10 Marks (CO1 & CO3)

B. B. A. (THIRD SEMESTER)
MID SEMESTER EXAMINATION, 2021
CONSUMER BEHAVIOUR

Time : 1½ Hours

Maximum Marks : 50

Note : (i) Answer all the questions by choosing any ***one*** of the sub-questions.

(ii) Each question carries 10 marks.

1. (a) Elucidate Consumer Decision-Making Process in detail along with examples.

10 Marks (CO1)

OR

(b) Describe Consumer Behaviour. Explain the scope and importance of Consumer Behaviour in marketing decisions.

10 Marks (CO1)

P. T. O.

118

2. (a) Define Personality. Discuss the characteristics of personality. Also explain Freudian and Neo-Freudian theory of personality. 10 Marks (CO2)

OR

(b) Define Social Class. Discuss various ways by which social class influences consumer behaviour. 10 Marks (CO2)

3. (a) Why should a marketer be concerned about consumer expectation in purchasing ? Explain giving examples. 10 Marks (CO1)

OR

(b) Consumer behaviour is a dynamic term with continuous interaction with environment. Explain. 10 Marks (CO1)

4. (a) Define Perception. Explain different aspects of perception along with perceptual process in detail. 10 Marks (CO2)

OR

(b) Explain the various factors that influence consumer buying behaviour. 10 Marks (CO2)

5. (a) What are the roles of consumers in the purchase process ? Explain with a relevant example. 10 Marks (CO3)

OR

(b) Define Self-Concept. Explain the importance of Self-Concept in Consumer Behaviour. 10 Marks (CO3)

MID SEMESTER EXAMINATION, 2021

PRODUCTION AND OPERATIONS MANAGEMENT

Time : 1½ Hours

Maximum Marks : 50

Note : (i) Answer all the questions by choosing any *one* of the sub-questions.

(ii) Each question carries 10 marks.

1. (a) Discuss the impact of JIT production on operations. Give examples.

10 Marks (CO2)

OR

(b) What are the types of maintenance ? Explain MTBF, MTTR and availability as measures of maintenance performance.

10 Marks (CO2)

P. T. O.

149

2. (a) What is the need of business forecasting ? Briefly explain any *four* techniques of forecasting. 10 Marks (CO2)

OR

(b) Write short notes on any *two* of the following : 10 Marks (CO2)

(i) Wastivity

(ii) Business strategies

(iii) Forecast error

3. (a) What are the main decisions of operations management ? 10 Marks (CO1)

OR

(b) What is Productivity ? Explain the factors that are critical to improving productivity. What is the difference between productivity of production systems and service systems ? 10 Marks (CO1)

4. (a) Use Johnson's rule to determine the sequence that results in the minimum flow time for the seven jobs listed ahead. All

jobs must follow the same sequence of machine 1 first and then machine 2 :

10 Marks (CO3)

Job	Machine 1	Machine 2
A	10	2
B	6	3
C	5	12
D	4	5
E	6	9
F	9	11
G	7	6

What is the minimum time flow to complete the jobs ? Also calculate job waiting time and machine idle time.

OR

(b) Use the data given in table ahead to develop a forecast using weighted moving averages. The weights are 0.2, 0.3 and 0.5

with the highest weight to the most recent data. Also calculate MAD of the forecast :

10 Marks (CO3)

Month	Demand
January	125
February	138
March	149
April	130
May	145
June	158
July	166
August	172
September	160
October	179
November	184
December	197

5. (a) Define Production Management. Identify the input, resources, primary transformation and desired output of the following : 10 Marks (CO1)

(i) a hospital

(ii) an airline

OR

(b) A retail store had sales of ₹ 55,000 in the month of June and ₹ 46,000 in the month of July. The store employs eight full time workers who work for a full 40 hours work week. In June, the store also had nine part time workers and in July the store had seven part time workers. The part time workers work only 15 hours per week. Using sales value as a measure of output, what is the percentage change in labour productivity from June to July ? (Assume 4 weeks per month.)
