BBA–501

B. B. A. (FIFTH SEMESTER)
END SEMESTER EXAMINATION, Nov.-Dec., 2021

LEGAL ASPECTS OF BUSINESS

Time : Three Hours

Maximum Marks : 100

Note : (i) All questions are compulsory.

(ii) Answer any *two* sub-questions among (a), (b) and (c) in each main question.

(iii) Total marks in each main question are twenty.

(iv) Each question carries 10 marks.

1. (a) What is the meaning, nature and objective of Law ? What are the various sources of Law ? (CO1)

(b) Mohd. sold some articles to Birbal on credit not knowing that Birbal was a minor. The time fixed for payment expired and no payment was made. Some time later when Birbal attained majority, Mohd. Sued him for the price.

Will he succeed ?

(b) A hired B's ship to carry a cargo from Russia. Later on B repudiated the contract. A delayed taking action hoping B would change his mind before the performance date. War broke out between Russia and Britain before the performance date, frustrating the contract. Discuss A's remedy. (CO1)

206

P. T. O.

(c) "No consideration no contract." Explain this rule and state the exceptions of this law. (CO1)

2. (a) What is discharge of contract ? Discuss in brief the various modes in which a contract may be discharged. (CO2)

(b) Explain clearly the meaning of bailment as per Indian Contract Act. Explain the essentials of contract of bailment. When does a contract of bailment terminate ? (CO2)

(c) What is agency ? Who can be appointed as agent ? What is meant by agency by ratification ? (CO2)

3. (a) What is understood by conditions and warranties ? Explain briefly the implied conditions and warranties in a contract of sale. (CO3)

(b) Why is it always important to determine the precise moment when property passes from seller to the buyer ? How is it determined ? (CO3)

(c) "All cheques are bills bust all bills are not cheques." Comment. (CO3)

4. (a) What do you mean by winding up of a company ? Differentiate between winding up by tribunal and winding up by members. (CO4)

(b) Define prospectus. Describe the consequences of misstatement in prospectus. (CO4)

(c) What do you mean by a company ? Explain various characteristics of a company. (CO4)

5. (a) What is understood by consumer protection ? What are the various rights given to a consumer as a part of Consumer Protection Act ?

(CO5)

(b) "LLP is an alternative corporate business form that gives the benefits of limited liability of a company and the flexibility of a partnership." Discuss.

(CO5)

(c) Explain the nature of RTI Act, 2005. State briefly the procedure of seeking information under RTI.

(CO5)

450

27/11/2021

Roll No. .....

BBA–502

B. B. A. (FIFTH SEMESTER)

END SEMESTER EXAMINATION, Nov.-Dec., 2021

QUANTITATIVE TECHNIQUES IN MANAGEMENT

Time : Three Hours

Maximum Marks : 100

Note : (i) All questions are compulsory.

(ii) Answer any *two* sub-questions among (a), (b) & (c) in each main question.

(iii) Total marks in each main questions are **twenty**.

(iv) Each question carries 10 marks.

1. (a) Describe the steps involved in decision-making. With the help of an example, explain pay-off table and regret table. What are the various decision-principles ? (CO2)

(b) Solve the following LPP using Simplex method : (CO3)

Minimize :

$$Z = 2X_1 + 3X_2$$

Subject to :

$$X_1 + X_2 \geq 350$$

$$X_1 \geq 125$$

$$2X_1 + X_2 \leq 600$$

$$X_1 \geq 0, X_2 \geq 0.$$

171

P. T. O.

(c) An FMCG goods seller has the following demand data collected over the last 100 days sales. He buys product X for ₹ 80 and sells it for ₹ 100. Any unsold units of the product are sold for ₹ 30 per unit. Following is the demand data, suggest to the seller the optimum quantity of product to be stocked. Also calculate the EVPI : (CO4)

Demand	No. of days
18	15
19	20
20	30
21	20
22	10
23	5

2. (a) What is a replacement problem ? Describe some important replacement situations and policies. (CO1)

(b) A company has 3 plants and 4 warehouses. The availability at each plant and requirement at each warehouse and the cost of transportation of one unit from the plant to the store are given below. Determine the optimal allocations : (CO3)

From plant	To warehouse			
	W_1	W_2	W_3	Supply
A	5	1	7	10
B	6	4	6	80
C	3	2	5	15
Demand	75	20	50	

(c) The management of a company is considering the question of marketing a new product. The fixed cost required in the project is ₹ 4,000. Three factors are uncertain–the selling price, the variable cost and the annual sales volume. The product has a life of only one year. The management has the following data on these factors : (CO6)

Selling price (₹)	Probability	Variable cost (₹)	Probability	Sales Volume (units)	Probability
3	0.2	1	0.3	2000	0.3
4	0.5	2	0.6	3000	0.3
5	0.3	3	0.1	4000	0.4

Consider the following sequences of 30 random numbers :

81, 32, 60, 04, 46, 31, 67, 25, 24, 10, 40, 02, 39, 68, 08, 59, 66, 90, 12, 64, 79, 31, 86, 68, 82, 89, 25, 11, 98, 16. Using the sequence, simulate the average profit for the above project on the basis of 10 trials.

3. (a) A truck owner finds from the past records that the maintenance cost of a truck (whose purchase price is ₹ 3,00,000) during the first 8 years of its life and the resale prices at the end of the year are as in the table below. Suggest an optimum policy for the replacement of the truck : (CO1, 3)

Year	Maintenance cost (₹)	Resale price (₹)
1	36,000	2,00,000
2	48,000	1,50,000
3	60,000	1,00,000
4	72,000	80,000
5	84,000	70,000
6	96,000	60,000
7	1,08,000	50,000
8	1,20,000	40,000

(b) A company plans to assign 5 salesmen to 5 districts in which it operates. Estimates of sales revenue in thousands of rupees for each salesman in different districts are given below. Determine the optimal assignment of salesmen to maximise the expected sales : (CO1, 3)

District / Salesman	D_1	D_2	D_3	D_4	D_5
S_1	40	46	48	36	48
S_2	48	32	36	29	44
S_3	49	35	41	38	45
S_4	30	46	49	44	44
S_5	37	41	48	43	47

(c) A company manufactures 30 units per day. The production cost is ₹ 40 and selling price is ₹ 50. Every unit unsold at the end of day is disposed off at a loss of ₹ 15. Any demand shortfall is estimated as a penalty of ₹ 5. The sale of items depends upon demand with the following probability distributions : (CO6)

Sale (units)	Probability
27	0.10
28	0.15
29	0.20
30	0.35
31	0.15
32	0.05

Using the random numbers : 60, 31, 24, 02, 08, 90, 79, 68, 25, 16, 59, 16, 12, 31, 82, 11, estimate the profit or loss to the company by simulating demand for next 15 days. If the company decides to produce 29 units per day, will there be any benefit ?

4. (a) Create appropriate mathematical models for the following decision-making situations : (CO5)

(i) An individual wants to invest ₹ 90,000 in fixed income securities. There are two options—Bond A and Bond B. Bond A gives a return of 10% and Bond B a return of 20%. The investor wants the amount invested in Bond A to be at least equal to amount invested in Bond B. Further, the amount invested in Bond A cannot be less than ₹ 18,000 and amount invested in Bond B not more than ₹ 36,000. Formulate the LPP such as the amount invested in each type of bond maximizes the income from investment.

(ii) ABC Ltd. manufactures two chemicals A and B which are sold to manufacturers of soaps and detergents. On the basis of the next month's demand, the management has decided that the total production for chemicals A and B should be at least 350 kilograms. Additionally there is a pending production order for 125 kilograms of chemical A that must be supplied in this month. Product A requires 2 hours of processing time per kg and product B requires one hour per kg. For the coming month, 600 hours of processing time are available. The production costs are ₹ 20 per kg and ₹ 30 per kg for products A and B respectively. Formulate the linear programming problem such as to minimize the production cost.

(b) Three plants P1, P2, and P3 supply goods to four warehouses A, B, C, and D. The capacity of production of these factories is 100, 30 and 70 units. The requirements at the warehouses are 40, 20, 60 and 80 units per month respectively. The profit matrix for the three factories is given below. Solve the problem to maximize the profit : (CO3)

Plant/Warehouse	A	B	C	D
P1	40	25	22	33
P2	44	35	30	30
P3	35	38	28	30

(c) Explain some techniques of operations research and their application in different areas of management. (CO4)

5. (a) A large computer installation contains 2000 components of identical nature which are subject to failure as per probability distribution that follows : (CO3)

Month end	% failure to data
1	10
2	25
3	50
4	80
5	100

Components which fail are replaced at a cost of ₹ 45 per unit. Alternatively, if all components are replaced at the same time, the cost of replacement is ₹ 15 per unit. Assess which policy of replacement is

more economical—group replacement at fixed intervals of time with individual replacements in between; or only individual replacements as and when failure occurs.

(b) A bookstore sells a particular book of law for ₹ 100. The book costs ₹ 80 per copy and unsold books are sold for ₹ 30 each. Based on past sales data, the seller has estimated the annual demand for the book as ranging from 18 to 23 copies. Assuming that the order for the book can be placed only once a year, determine how many copies of the book should be purchased by the bookstore for the next year ? Also calculate EVPI : (CO4)

Demand	Probability
18	0.05
19	0.10
20	0.30
21	0.40
22	0.10
23	0.05

(c) Define simulation. Why is simulation used ? Explain the basic steps of Monte-Carlo simulation. (CO1)

END SEMESTER EXAMINATION, Nov.-Dec., 2021

PERSONAL SELLING AND SALES FORCE MANAGEMENT

Time : Three Hours

Maximum Marks : 100

Note : (i) All questions are compulsory.

(ii) Answer any *two* sub-questions among (a), (b) and (c) in each main question.

(iii) Total marks in each main question are twenty.

(iv) Each question carries 10 marks.

1. (a) Today there is an increasing talk of the "new and critical role of a sales person." In this context elaborate the various functions of a sales-person. (CO2, CO3, CO5)

(b) If you were selling mutual funds, what prospect information would you want to obtain prior to making a sales presentation ? (CO2, CO3, CO5)

(c) What is the difference between Advertising and Personal Selling ? Substantiate your answer with suitable example from education industry. (CO2, CO3, CO5)

145

P. T. O.

2. (a) What do you understand by the non-verbal communication ? How does it help in sales interaction ? Furnish suitable example. (CO2, CO6)

(b) What do you mean by 'Presentation' and 'Presentation Skills' ? Discuss some principles of effective presentation. (CO2, CO6)

(c) Write a brief essay on "Tools for Selecting Salesman". (CO2, CO6)

3. (a) What is the difference between AIDAS theory of selling and the buying formula theory of selling ? Explain by taking the example of any sales situation of your choice. (CO6, CO2, CO5)

(b) How would you plan your sales presentation if you were a salesperson responsible for selling personal computers to individual consumers ? (CO6, CO2, CO5)

(c) Distinguish between salesmanship and personal selling. (CO6, CO2, CO5)

4. (a) Discuss various activities involved in 'Sales Force Management'. (CO1, CO4,CO3)

(b) What is the importance of Proper Selection and recruitment of Sales People ? What are the various sources of Recruitment ? (CO1, CO4,CO3)

(c) Write an essay on 'Personal Selling', bringing out clearly the concept, desirable qualities of salespersons and the process involved therein. (CO1, CO4,CO3)

5. (a) 'Personal Selling is persuasive communication between a seller and a buyer.' Explain. (CO5, CO6)

(b) What is the 80-20 principle and how does it apply to sales performance evaluation ? (CO5, CO6)

(c) Explain why a salesperson's job is not over even after getting an order. (CO5, CO6)

COST ACCOUNTING

Time : Three Hours

Maximum Marks : 100

Note : (i) All questions are compulsory.

(ii) Answer any *two* sub-questions among (a), (b) & (c) in each main question.

(iii) Total marks in each main questions are **twenty**.

(iv) Each question carries 10 marks.

1. (a) Define Cost Accounting. State the difference between Cost Accounting and Financial Accounting. (CO1, CO3)

(b) Explain the different methods of costing. (CO1, CO3)

(c) Prepare Stores Ledger Account on the basis of LIFO from the following information : (CO1, CO3)

May

1 Purchased 600 units @ ₹ 30 per unit

146

P. T. O.

11	Purchased 200 units @ ₹ 35 per unit
16	Issued 300 units
18	Purchased 500 units @ 40 per unit
22	Issued 300 units
25	Purchased 400 units @ 45 per unit
28	Issued 200 units
30	Issued 500 units

2. (a) Explain the role of various departments in labour cost control. (CO1)

(b) What is process costing ? State the procedures for preparing process costing. (CO2)

(c) Prepare a cost sheet of the following data relating to the manufacture of Jeans : (CO4)

Number of Jeans manufactured during the month	1,000
	(₹)
Direct materials consumed	20,000
Direct labour	8,000
Indirect labour (in factory)	2,500
Supervision costs (in factory)	1,000
Factory premises rent	1,600
Factory lighting	600

Oil for machines	100
Depreciation of machines	500
Office overheads	8,000
Office salaries	2,000
Misc. office expenses	1,000
Selling and distribution overheads	6,000

Note : A profit margin of 20% on the total cost of goods is expected on the sales of Jeans.

3. (a) A factory is currently working to 40% capacity and produces 10000 units. At 50% the selling price falls by 3%. At 90% capacity the selling price falls by 5% accompanied by similar fall in prices of raw material. Estimate the profit of the company at 50% and 90% capacity production. The cost at present per unit is : (CO1)

Material	₹ 10
Labour	₹ 3
Overheads	₹ 5 (60% fixed)

The selling price per unit is ₹ 20 per unit.

(b) What is marginal costing ? State the advantages and disadvantages of marginal costing. (CO2)

(c) State the procedure of preparing the statement of cost by marginal costing method. (CO5)

4. (a) The following results of company for the last two years are as follows : (CO1)

Year	Sales (₹)	Profit (₹)
2014	1,50,000	20,000
2015	1,70,000	25,000

You are required to calculate :

(i) P/V Ratio

(ii) B. E. P.

(iii) The sales required to earn a profit of ₹ 40,000

(iv) Profit when sales are ₹ 2,50,000

(v) Margin of safety at a profit of ₹ 50,000

(vi) Variable costs of the two periods.

(b) State the difference between unit costing and job costing. (CO2)

(c) Write a short note on various methods of inventory control. (CO5)

5. (a) Present the following information to show to management : (CO2)

(i) The marginal product cost and the contribution p. u.

(ii) The total contribution and profits resulting from each of the following sales mix results :

Particulars	Product	Per unit (₹)
Direct Materials	A	10
Direct Materials	B	9
Direct Wages	A	3
Direct Wages	B	2

Fixed Expenses ₹ 800

(Variable expenses are allotted to products at 10% direct wages)

Sales Price A ₹ 20

Sales Price B ₹ 15

Sales Mixtures :

(i) 100 units of product A and 200 of B.

(ii) 150 units of product A and 150 of B.

(iii) 200 units of Product A and 100 of B.

(b) What is Reconciliation Statement in Cost Accounting ? (CO3)

(c) State the procedure in the preparation of Reconciliation Statement. (CO5)

140

13

HRD : SYSTEMS AND STRATEGIES

Time : Three Hours

Maximum Marks : 100

Note : (i) All questions are compulsory.

(ii) Answer any *two* sub-questions among (a), (b) and (c) in each main question.

(iii) Total marks in each main question are **twenty**.

(iv) Each question carries 10 marks.

1. (a) Define and explain the concept and perspectives on Human Resource Management. Is there any difference between human resources management and human resource development ? Justify your answer with examples. (CO1,CO2, CO4)

(b) Enlist the role and responsibilities of a HRD manager. What are the competencies necessary to effectively discharge the role and responsibilities ? (CO1,CO2, CO4)

(c) Discuss current trends and challenges to HRD professionals that affect present or future working environment. (CO1,CO2, CO4)

K-7

P. T. O.

2. (a) Compare and contrast the need-based and cognitive-based approaches to understanding motivation. (CO3, CO5, CO6)

   (b) Why do people with low self-efficacy perform more poorly in training programmes than those with high self-efficacy ? What might be done to address problems with low self-efficacy ? (CO3, CO5, CO6)

   (c) Investigate and enumerate the factors influencing employee behavior. (CO3, CO5, CO6)

3. (a) Discuss the learning strategies and styles. (CO1, CO2, CO5)

   (b) "Training becomes even more critical than before as organizations compete and change." Examine the statement. (CO1, CO2, CO5)

   (c) Describe the HRD framework. (CO1, CO2, CO5)

4. (a) Define and explain the goals of employee orientation/onboarding. Identify the characteristics of an effective orientation/onboarding program. (CO1, CO2, CO4)

   (b) What is meant by the term performance management and how is this different from the performance appraisal practices that are common in many organizations ? Why is it important to coach employees with performance problems, as well as employees who are performing well ? (CO1, CO2, CO4)

   (c) Explain why employee counseling and wellness services can be considered HRD programs. Enlist and explain the different techniques of employee counseling. (CO1, CO2, CO4)

5. (a) Describe the four levels of evaluation that make up Kirkpatrick's evaluation framework of HRD. (CO1, CO2, CO5)

(b) Explain the stages of career development model. (CO1, CO2, CO5)

(e) Critically examine the present scenario of Human Resource Development in Indian context. Give suitable examples to justify your answer. (CO1, CO2, CO5)

VENTURE CREATION : IDEATION FOR NEW VENTURE

Time : Three Hours

Maximum Marks : 100

Note : (i) All questions are compulsory.

(ii) Answer any *two* sub-questions among (a), (b) and (c) in each main question.

(iii) Total marks in each main question are **twenty**.

(iv) Each question carries 10 marks.

1. (a) What is entrepreneurship ? What are the common myths of entrepreneurship ? (CO1, CO2 & CO3)

(b) Explain the opportunity identification techniques in detail. (CO1, CO2 & CO3)

(c) Write the theory of entrepreneurial motivation with suitable example. (CO1, CO2 & CO3)

2. (a) What is innovation ? Explain the process of innovation in detail. (CO2 & CO3)

P. T. O.

148

(b) What is ideation ? Explain the ideation process with suitable example. (CO2 & CO3)

(c) What is feasibility analysis ? Explain the importance of feasibility analysis in business development. (CO2 & CO3)

3. (a) Describe the importance of market research in venture planning. (CO4)

(b) What is a business plan ? Write a business plan for a digital technology-based startup. (CO4)

(c) What is goal setting ? Write the importance of goal setting in startup development. (CO4)

4. (a) What is entrepreneurial finance and its importance for startups ? (CO6 & CO4)

(b) What is consumer value preposition ? Write the importance of consumer value preposition with suitable example. (CO6 & CO4)

(c) What is the importance of entrepreneurship ecosystem ? Explain the ecosystem in detail. (CO6 & CO4)

5. (a) Describe the various factors that impact entrepreneurship process. (CO5 & CO6)

(b) What is intellectual property ? Explain patent, copyright and trademark in detail. (CO5 & CO6)

(c) What is TRIM ? Write its importance in entrepreneurial planning. (CO5 & CO6)

MARKETING OF SERVICES

Time : Three Hours

Maximum Marks : 100

Note : (i) All questions are compulsory.

(ii) Answer any *two* sub-questions among (a), (b) and (c) in each main question.

(iii) Total marks in each main question are **twenty**.

(iv) Each question carries 10 marks.

1. (a) What is Service and what is the relevance for study of service marketing ? (CO1 & CO2)

(b) How has the Indian economy adopted to cater the new upcoming demand for services ? (CO1 & CO2)

(c) What are the key reasons for the growth of services ? (CO1 & CO2)

2. (a) What are the various challenges which are being faced by service industry in India ? (CO1 & CO3)

(b) Illustrate Value chain model for highlighting primary and support activities. (CO1 & CO3)

102

P. T. O.

(c) Discuss the core difference between Tangible Products and Services. (CO1 & CO3)

3. (a) Elaborate the 7P's of Services with explanatory examples at every stage. (CO2)

(b) Illustrate Service Triangle and explain taking an example. (CO2)

(c) What is Concept of Value Delivery ? What are the various strategies adopted by the marketer for delivering optimum value to its customers ? (CO2)

4. (a) What is a service delivery system ? What are the methods of designing a service delivery system ? (CO2 & CO4)

(b) What is Service Quality ? How is it calculated ? (CO2 & CO4)

(c) How can unprompted and unsolicited employee actions lead to customer dissatisfaction ? (CO2 & CO4)

5. (a) Taking example of a facility develop a service blueprint for a service facility. (CO5 & CO6)

(b) Develop a strategy for the *four* types of services i.e. People, Possession, Mental and Information processing of services. (CO5 & CO6)

(c) Illustrate the various GAPs in Service quality. (CO5 & CO6)

Time : Three Hours

Maximum Marks : 100

Note : (i) All questions are compulsory.

(ii) Answer any *two* sub-questions among (a), (b) and (c) in each main question.

(iii) Total marks in each main question are **twenty**.

(iv) Each question carries 10 marks.

1. (a) Explain the factors contributing to the growth of derivatives. (CO1)

   (b) Explain different types of option strategy. (CO1)

   (c) Define the types of derivative products. (CO1)

2. (a) Define impact of thirty years of liberalization on Indian economy. (CO1)

   (b) Define Primary market and Secondary market. (CO1)

   (c) Explain procedure of listing of a company in stock market since its inception. (CO1)

120

P. T. O.

3. (a) A stock price is \$29. An investor buys one call option contract on the stock with a strike price of \$30 and sells a call option contract on the stock with a strike price of \$32.5. The market price of the option are \$2.75 and \$1.50 respectively. The option have the same maturity date. Describe the investor's position. (CO2)

(b) Define impact of age, financial literacy and family responsibility in financial planning. (CO2)

(c) Explain purchasing power parity. (CO2)

4. (a) The price of the gold currently \$1000 per ounce. The forward price of the delivery in 1 year is \$1200. An arbitrageur can borrow money at 10% per annum. What should the arbitrageur do ? Assume that the cost of storing gold is zero and the gold provide no income. (CO3, CO2)

(b) The current price of a stock is \$94 and 3-month European call option with a strike of \$95 currently sell for \$4.70. An investor who feels that the price of the stock will increase is trying to decide between buying 100 shares and buying 2000 call option (20 contracts). Both strategies involve an investment of \$9,400. What advice would you give ? How high does the stock price have to rise for the option strategy to be more profitable ? (CO3, CO2)

(c) "Speculation interest in future markets is pure gambling. It is not in public interese to allow speculators to trade on a future exchange." Discuss this viewpoint. (CO4)

5. (a) What does a stop order to sell at $ 2 mean ? When might it be used ? What does a limit order to sell at $2 mean ? When might it be used ?

(CO5)

(b) Differentiate between Future contract and Forward contract. (CO5)

(c) Distinguish between the terms Open Interest and Trading Volume.

(CO5)
