Roll No.....

Mid Semester Examination

Name of the Program: M.Tech (VLSI Design and Systems) *Semester:* IIIrd
Name of the Course: Organic Electronic Devices and Circuits *Course Code:* VDM 391

Time: 90 Minutes Maximum Marks: 50

Note:

(i) Answer **all the questions** by choosing ***any one of the sub questions***.
(ii) Each question carries 10 marks

Q1	(10 marks)	CO1
(a)	Describe the advantages and disadvantages of organic semiconductors over silicon.	
	OR	
(b)	Describe all the different organic semiconductor, contact electrode, dielectric, and substrate materials used to create organic thin film transistors (OTFT), along with their names.	
Q2	(10 marks)	CO1
(a)	Why are the energy states of HOMO and LUMO significant? and explain how charges travel inside an organic semiconductor.	
	OR	
(b)	Explain the Organic Thin Film Transistor (OTFT) operating principle and draw output and transfer characteristics using a suitable diagram.	
Q3	(10 marks)	CO1/CO2
(a)	Give an explanation of the single-gate (SG) and double-gate (DG) OTFT structures.	
	OR	
(b)	Describe the various applications of OTFT also describe the merits and demerits of OTFTs over conventional MOSFETs.	
Q4	(10 marks)	CO1/CO2
(a)	Draw the chemical composition of the following substances: (i)Pentacene (ii) Tetracene (ii)TIPS Pentacene (iv) P3HT (iii) Poly-acetylene (vi) poly-thiophene	
	OR	
(b)	Why bottom gate OTFT is preferred over top gate OTFT, explain and describe the flow diagram of the fabrication process for OTFT in top and bottom contact structure.	
Q5	(10 marks)	CO1/CO2
(a)	Discuss the distinctions between small molecules and conductive polymers Using a relevant example.	
	OR	
(b)	Describe the basic Fabrication Steps of SG and DG of OTFT.	

Note for the question paper setters: (Assuming two units are covered)

- **Question paper should have questions from both the units covering the related COs**
- **Sub questions (a) and (b) can be further divided if required**

MID TERM EXAMINATION 2023

Name of the Program: **M.Tech. (CAD/CAM)** *Semester*: III

Name of the Course: **Cost Management of Engineering Projects**

Course Code: OEME02

Time: 1.5 Hours **Maximum Marks: 50**

Note:

All questions are compulsory

(i) Answer any two sub questions among a, b & c in each main question

(ii) Total marks in each main question are twenty

(iii) Each question carries 10 marks

Q1	(10 marks)	CO1
a)	What is the concept of strategic cost management? What is the cost management with example?	
	OR	
b)	Explain the business process of re-engineering management strategy.	
c)	Differences between traditional and strategic cost management. What are the types of cost?	
Q2	(10 marks)	CO2
a)	What are the cost concepts in decision making for engineering projects? What is cost and its formula?	
	OR	
b)	What is project? Describe the importance of planning process for projects execution?	
Q3.	(10 marks)	CO3
a)	Explain the following project cost, bar charts and network diagram.	
	OR	
b)	Explain the role of project manager in the project execution.	
Q4	(10 marks)	CO4
a)	What is the distinction between marginal costing and absorption costing?	
	OR	
b)	Explain how the cost behavior and profit marginal costing helps to make decision for project execution.	
Q5	(10 marks)	CO1 CO5
a)	Explain the POSDCROB helpful for project management.	
	OR	
b)	Who is the father of cost management? What are the 4 main functions of cost management?	

Roll Number:_____

Mid Semester Examination 2023

Name of the Program: M.Tech. (Geo-Informatics) Semester: *III*
Name of the Course: Cost Management of Engineering Projects *Course Code:* OCE 351

Time: 1-1/2 Hour Maximum Marks: 50

Note:

(i) Answer **all the questions** by choosing ***any one of the sub questions***.
(ii) Each question carries 10 marks

Q1
(a) Discuss in detail Cost concepts in decision-making? (10 marks)

OR **CO1**

(b) Explain in detail the role of Incremental cost and Opportunity cost in project works?

Q2
(a) Discuss the various stages of project execution and also discuss the concept of commissioning of project? (10 marks)

OR **C01**

(b) Describe Creation of a Database for operational control and explain the importance of provision of data for Decision-Making?

Q3
(a) Describe in detail project execution as conglomeration of technical and nontechnical activities? (10 marks) **CO2**

OR

(b) Explain Pre project execution main clearances?

Q4
(a) Explain in detail project team and role of each member in project execution? (10 marks)

CO2

OR

(b) Describe the importance of project site and data required with its significance?

Q5
(a) Explain Project contracts and its Types and contents that are essential for any project ? (10 marks)

OR

CO2

(b) Explain in detail with suitable examples bar charts and network diagram

Roll Number:_____

Mid Semester Examination 2023

Name of the Program: M.Tech. (Structural Engineering) Semester: *III*
Name of the Course: Cost Management of Engineering Projects *Course Code:* OCE 351

Time: 1-1/2 Hour Maximum Marks: 50

Note:

(i) Answer **all the questions** by choosing ***any one of the sub questions.***
(ii) Each question carries 10 marks

Q1 (10 marks)

(a) Discuss in detail Cost concepts in decision-making?

OR **CO1**

(b) Explain in detail the role of Incremental cost and Opportunity cost in project works?

Q2 (10 marks)

(a) Discuss the various stages of project execution and also discuss the concept of commissioning of project?

OR **C01**

(b) Describe Creation of a Database for operational control and explain the importance of provision of data for Decision-Making?

Q3 (10 marks)

(a) Describe in detail project execution as conglomeration of technical and nontechnical activities? **CO2**

OR

(b) Explain Pre project execution main clearances?

Q4 (10 marks)

(a) Explain in detail project team and role of each member in project execution? **CO2**

OR

(b) Describe the importance of project site and data required with its significance?

Q5 (10 marks)

(a) Explain Project contracts and its Types and contents that are essential for any project ?

OR **CO2**

(b) Explain in detail with suitable examples bar charts and network diagram

Roll No.....

Mid Semester Examination-2023

Name of the Program: M.Tech. (CSE) *Semester*: 3rd

Name of the Course: Intrusion Detection Systems *Course Code*: **MCS 324**

Time: 90 Minutes Maximum Marks: 50

Note:

(i) Answer **all the questions** by choosing ***any one of the sub questions***.

(ii) Each question carries 10 marks

Q1	(10 marks)	CO1
(a)	Describe that compared to Validation Exposure Randomness Deallocation Improper Conditions Taxonomy (VERDICT), Hansman's taxonomy is more complete and practical.	
	OR	
(b)	What do you understand about Network Probes? List the name and briefly describe publically available tools that are used for network probing.	
Q2	(10 marks)	CO1
(a)	What is Payload attack? Classify and define the categories of Payload attack.	
	OR	
(b)	Elaborate about Privilege escalation attacks. What are the types of Privilege Escalation Attacks?	
Q3	(10 marks)	CO1,CO2
(a)	Explain about the ARP poisoning. What are the methods to avoid the ARP poisoning?	
	OR	
(b)	Discuss pros and cons of supervised and unsupervised anomaly detection approach.	
Q4	(10 marks)	CO2
(a)	How the network-based Intrusion detection system is useful to collect and analyze the data directly from the Network? Discuss about the SNMP.	
	OR	
(b)	What are the important sources that is used for data collection for development of Host based Intrusion detection systems?	
Q5	(10 marks)	CO2, CO3
(a)	Data collection is one of the most important steps when designing an Intrusion Detection System (IDS), in order to this what are the Important methods to monitor each layer on networks? Is it possible to design an efficient IDS for monitoring each layer? Explain it.	
	OR	
(b)	What do you mean by the Boolean logic and fuzzy logic and also demonstrate it by mathematical notation with suitable example? Explain how is fuzzy logic useful in anomaly Detection?	

Roll No. | | | | | | | |

Mid Semester Examination October 2023

Name of the Course: M. Tech
Name of the Course: Design of Formwork
Time: 90 minutes

Semester: III
Course Code: MSE 322
Maximum Marks: 50

Note:-

(i) **Answer all the questions by choosing any one of the sub questions.**
(ii) **Each question carries 10 marks**

Q1	**(10marks)**	**CO1**
(a)	Explain the following terms used in formwork: Form, Falsework, Centering, Mould, Scaffolding	
	OR	
(b)	Mention about the requirements of formwork?	
Q2	**(10 marks)**	**CO1**
(a)	Elaborate the various factors affecting the selection of formwork system?	
	OR	
(b)	Discuss the factors affecting reuse of timber formwork?	
Q3	**(10 marks)**	**CO1**
(a)	What are the different formwork materials being used in construction? Discuss their suitability?	
	OR	
(b)	What are the various possible horizontal and vertical loads exerted on formworks?	
Q4	**(10 marks)**	**CO2**
(a)	Enlist the various factors affecting lateral pressure of fresh concrete	
	OR	
(b)	Which correction factors need to be considered for the pressure calculation of concrete mixes made with different types of cement and workability as specified in IS: 14687–1999.	
Q5	**(10 marks)**	**CO2**
(a)	Mention the assumptions to be used during computation of bending moments, shear force and deflection in analysis and design of formwork.	
	OR	
(b)	Estimate the total load exerted on the formwork of a RCC slab of thickness 250 mm. Assume a live load of 2.4 kN/m^2 and self-weight of forms as 0.4 kN/m^2.	

Roll No. | | | | | | | |

Paper Code: MGI-332

M.Tech. (Geo-Informatics)

Mid Semester Examination 2023

III *Semester*

Application of Geo- informatics in Water Resources Management

Time: 1:30 Hours MM: 50

Note:

(i) All questions are compulsory.

(ii) Answer any one sub questions among a & b in each main question.

(iii) Total marks for each main question are ten.

Q1 (1x10 = 10 Marks)

a Explain the hydraulic cycle in nature with the help of a neat sketch, indicating its various phases?

b Describe the function of hydrology in water resources development? Explain the basic hydrological requirements for a river basin development? CO1

Q2 (1x10 = 10 Marks)

a Explain the terms Population and sample, Central tendency and Variability in elements of Statistics?

b "The mathematical models in Hydrology can be classified" Explain all the types? CO1

Q3 (1x10 = 10 Marks)

a Explain and Draw Generalized diagram of the runoff process at local scale?

b Enlist the Surface-Water Hydrologic Data with sub data? CO2

Q4 (1x10 = 10 Marks)

a "Precipitation products are estimated ground-accumulated rainfall. Precipitation products available include" enlist and describe the available form of data?

b "Satellite imagery can provide useful information on rainfall distribution over large areas and inaccessible regions," describe the estimation form? CO2

Q5 (1x10 = 10 Marks)

a Describe Estimation Of Water-Supply Demands and enlist Water-Supply and Irrigation Systems Data

b Describe GIS-Based Water Network Optimization and draw the flowchart of WADSOP optimization procedure? CO2

Mid Semester Examination 2023

Name of the Program: M.Tech. *Semester: 3rd*

Name of the Course: Research Methodology and IPR *Course Code:* **MME 301**

Time: 90 minutes Maximum Marks: 50

Note:

(i) Answer **all the questions** by choosing ***any one of the sub questions***.

(ii) Each question carries 10 marks

Q1	(10 marks)	**CO1/CO1**
(a)	Describe the meaning of research problem.	
	OR	
(b)	What are the important sources to find out the research problem?	
Q2	(10 marks)	**CO1/ CO1**
(a)	Explain the criteria characteristics of effective research problem.	
	OR	
(b)	Elaborate on the common errors made when selecting a research problem.	
Q3	(10 marks)	**CO1/CO1**
(a)	What is plagiarism, and what are effective strategies to prevent it?	
	OR	
(b)	How to ensure research ethics and integrity?	
Q4	(10 marks)	**CO1/CO1**
(a)	What are the most effective data analysis techniques?	
	OR	
(b)	What is validity and reliability in research?	
Q5	(10 marks)	**CO2/CO2**
(a)	What are the Necessary Instrumentations of data collections and analysis?	
	OR	
(b)	What are effective approaches for conducting literature studies?	

MID Semester Examination 2023

Name of the Program: M.Sc.(IT)
Name of the Course: JAVA Programming

Semester: III
Course Code: TMI 301

Time: 1.5 Hour

Maximum Marks: 50

Note:

i. Answer **all the questions** by choosing ***any two of the sub questions***.
ii. Each question carries 10 marks

Q1	(10 marks)	
(a)	What is the use of final keyword in java? Write a program to find whether entered string is palindrome or not.	CO1
	OR	
(b)	What is the use of package in java? Write a program to show the working of static import.	CO2
Q2	(10 marks)	
(a)	What is method overriding? Write a program to show the use of this keyword properly while overriding any of methods of Object class.	CO2
	OR	
(b)	How we can use wrapper classes in java? Write a program to show the use of super keyword in three way.	CO1
Q3	(10 marks)	
(a)	What is the use of command line arguments? Write a program to print all command line arguments values in reverse orders.	CO1
	OR	
(b)	What is array of objects in java? Write a program to print random numbers between 1 to 5 infinitely.	CO2
Q4	(10 marks)	
(a)	What is the use of finally keyword in java ?Write all steps to create an executable jar file.	CO2
	OR	
(b)	What is difference between interface and abstract class? Write a program to show how we can use an interface in Upcasting.	CO3
Q5	(10 marks)	
(a)	What is the use of StringBuffer over String class?Write a program to enter a string and print all characters removing duplicates from it.	CO1
	OR	
(b)	What are Checked and unchecked exceptions in java?Write a program to generate and throw custom exception name MyException if there is any of vowels in entered string.	CO2

Roll No. | | | | | | | |

MID SEMESTER EXAMINATION 2023

Name of the Program: M. Tech (VLSI Design and Systems) Semester: IIIrd Semester

Name of the Course:**Internet of Things** Course Code:**VOM 302**

Time: 90 Minutes Maximum Marks: 50

Note:-

(i) Answer **all the questions** by choosing **any one of the questions**.

(ii) Each question carries 10 marks

Q1	(10marks)	
(a)	Explain History of Internet of Things (IoT)? What are its applications?	CO1
	OR	
(b)	Explain general observation regarding IoT.	
Q2	(10 marks)	
(a)	What areStructural aspects of IoT?	
	OR	CO2
(b)	What are key IoT Technologies?	
Q3	(10 marks)	
(a)	Explain the following things: (a) Things in IoT; (b) Physical Design in IoT	CO1
	OR	
(b)	What are basic nodal capabilities regarding IoT?	
Q4	(10 marks)	
(a)	Explain Scalability, Interoperability for IoT.	CO2
	OR	
(b)	What is standard consideration in IoT? Explain with the help of example and diagram.	
Q5	(10 marks)	
(a)	How the ITUT view provides better understanding for IoT?	CO1
	OR	
(b)	Explain the IoT Layers in details.	CO2

Roll No. | | | | | | | |

Mid Semester Examination October 2023

Name of the Course: M. Tech
Name of the Course: Soil Structure Interaction
Time: 90 minutes

Semester: III
Course Code: MSE 315
Maximum Marks: 50

Note:-

(i) **Answer all the questions by choosing any one of the sub questions.**
(ii) **Each question carries 10 marks**

Q1	**(10marks)**	CO1
(a)	Discuss in Detail "Different Types of Soil-Structure interaction modeling	
	OR	
(b)	Define the following terms: a) Free Field Motion b) Foundation Input motion	
Q2	**(10 marks)**	CO1
(a)	Discuss in detail "How High structure-to-soil stiffness ratio lengthen Time Period and change design forces.	
	OR	
(b)	Determine the effective profile depth z_p , in ft, with the following information provided: B = overall foundation half width, 30 ft. B is in the parallel to the direction of loading L = overall foundation half width, 45 ft. L is perpendicular to the direction of loading	
Q3	**(10 marks)**	CO1
(a)	With the following information provided, state whether the SSI effect should be taken into consideration or not? h' = effective structure height = 35 ft v_s = the average effective shear wave velocity (ft/s) for site soil conditions = 850 ft/sec T = fundamental mode of the structure = 0.5 sec	
	OR	
(b)	Discuss in detail "How Foundation rocking Impact the superstructure behavior?"	
Q4	**(10 marks)**	CO2
(a)	What do you understand by BASE SLAB AVERAGING? Discuss in detail	
	OR	
(b)	Define the following terms related to base slab averaging • Equivalent foundation size • Effective Foundation size	
Q5	**(10 marks)**	CO2
(a)	Highlight Minimum 3 limitations to using base slab averaging effects in ASCE/SEI 7-16	
	OR	
(b)	Discuss the procedure for fixing the Depth of embedment for a building on a mat foundation.	

Roll No. | | | | | | | |

Paper Code: MGI-313

M.Tech. Geo-Informatics

End Semester Examination 2023

3th Semester

APPLICATION OF GEOINFORMATICS FOR NATURAL RESOURCES MANAGEMENT

Time: 01:30

MM: 50

(i) Answer all the questions by choosing any one of the sub questions.

(ii) Each question carries 10 marks

Q1.		(10 Marks)
(a)	Explain the utility of Land use /land cover mapping.	CO1
(b)	Explain the utility of Lithological mapping using Remote sensing.	CO1
Q2.		(10 Marks)
(a)	Describe the groundwater prospect zonation mapping.	CO1
(b)	Explain groundwater contamination.	CO1
Q3.		(10 Marks)
(a)	Discuss the utilization of Remote sensing in Soil Mapping	CO2
(b)	Discuss the Agro-land suitability assessment using remote sensing	CO2
Q4.		(10 Marks)
(a)	Discuss the utility of RS&GIS in the mining area	CO2
(b)	Discuss the utility of RS&GIS in soil erosion mapping	CO2
Q5.		(10 Marks)
(a)	Discuss the utility of GIS in site suitability analysis for groundwater recharging	CO2
(b)	Discuss the key factors for runoff analysis in GIS platform	CO2

Mid Semester Examination 2023

Name of the Program: M.Tech *Semester:* III
Name of the Course: Computer Aided Analysis of Mechanical Systems
Course Code: **DEME53**

Time: 1 1/2 Hour Maximum Marks: 50

Note:

(i) Answer **all the questions** by choosing ***any one of the sub questions***.
(ii) Each question carries 10 marks

Q1	(10 marks)	**CO1**
a)	What are the various types of mechanical systems whose analysis can be possibly carries out using a computer?	
	OR	
b)	How is a computer helpful to analyze a mechanical system?	
Q2	(10 marks)	**CO1**
a)	What is a cam? Draw an explain a cam profile.	
	OR	
b)	Write an algorithm and MATLAB code for producing a cam profile.	
Q3	(10 marks)	**CO1 and CO2**
a)	Explain the finite difference method using Taylor series.	
	OR	
b)	Explain the governing equation of spring mass damper system.	
Q4	(10 marks)	**CO2**
a)	What is the central difference method. How can it be applied to spring mass damper system.	
	OR	
b)	How can you choose the time step for numerical calculations of spring mass damper system?	
Q5	(10 marks)	**CO2**
a)	What is Runge Kutta method. Explain in detail.	
	OR	
b)	How can Runge Kutta method be applied to spring mass damper system?	

Note for the question paper setters:

- **Question paper should have questions from each unit and cover all COs**
- **Sub questions (a) and (b) can be further divided if required**

Roll No. : .....

MID SEMESTER EXAMINATION 2023-24

Name of the Program: **M.Tech (CSE)** Semester: 3

Name of the Course: **Soft Computing** Course Code: MCS-301

Time : 90 Minutes **Maximum Marks : 50**

Note:

i. Answer all the questions by choosing any one of the sub questions
ii. Each questions carries 10 marks

Q1	(10 Marks)	CO1
(a)	Justify the following statement:"Partial membership is allowed in fuzzy sets".	
	OR	
(b)	Describe the importance of fuzzy sets and its application in engineering sector	
Q2	(10 Marks)	CO2
(a)	Compare and contrast biological neurons and artificial neurons	
	OR	
(b)	Differentiate between supervised and unsupervised learning?	
Q3	(10 Marks)	
(a)	Indicate the difference between Soft computing and Hard computing.	CO2
	OR	
(b)	Why is the McCulloch-Pitts neuron widely used in logic function? Implement AND Gate using the McCulloch-Pitts neuron model?	
Q4	(10 Marks)	
(a)	Justify XOR function is non Linearly separability separable by a single decision boundary line	
	OR	
(b)	For two fuzzy sets A={ $\frac{0.2}{LS}+\frac{0.5}{MS}+\frac{0.7}{HS}$ } B= A={ $\frac{0.2}{LS}+\frac{0.55}{MS}+\frac{0.7}{HS}$ } Find R=A X B	CO1
Q5	(10 Marks)	
(a)	Two fuzzy relations are given by $\bar{R} = \begin{array}{c c} & \begin{array}{cc} y_1 & y_2 \end{array} \\ \begin{array}{c} x_1 \\ x_2 \end{array} & \begin{bmatrix} 0.7 & 0.6 \\ 0.8 & 0.3 \end{bmatrix} \end{array}$ and $\bar{S} = \begin{array}{c c} & \begin{array}{ccc} z_1 & z_2 & z_3 \end{array} \\ \begin{array}{c} y_1 \\ y_2 \end{array} & \begin{bmatrix} 0.8 & 0.5 & 0.4 \\ 0.1 & 0.6 & 0.7 \end{bmatrix} \end{array}$ Obtain fuzzy relation T as a composition between the fuzzy relations. Find the Max-min and Max-product composition	CO2
	OR	
(b)	Consider two fuzzy sets A={ $\frac{1}{2.0}+\frac{0.65}{4.0}+\frac{0.5}{6.0}+\frac{0.35}{8.0}+\frac{0}{10.0}$ } B= A={ $\frac{0.2}{2.0}+\frac{0.55}{4.0}+\frac{0.7}{6.0}+\frac{0.65}{8.0}+\frac{1}{10.0}$ } Find the following (1) AUB (2) A∩B (3) AU$\bar{A}$ (4) $\overline{AUB}$ (5) $\overline{A \cap B}$

Internet GIS

Time: 1:30 Hours

MM: 50

Note:
(i) All questions are compulsory.
(ii) Answer any one sub questions among a & b in each main question.
(iii) Total marks for each main question are ten.

Q1 (1x10 = 10 Marks)

a Describe the term web GIS. Explain few key elements essential to web GIS.

b Explain the importance of web service and explain the steps to work with web service? CO1

Q2 (1x10 = 10 Marks)

a "By utilizing the Internet to access information over the web without regard to how far apart the server and client might be from each other, web GIS introduces distinct advantages over traditional desktop GIS" describe the advantages?

b "There are five key elements in a web GIS application, all of which can be accessed through the web or a local area network (LAN)" justify the statement by describing all the elements in a web GIS. CO1

Q3 (1x10 = 10 Marks)

a "The client/Server architecture is based on hardware and software components that interacts to form a system. This system includes three main components" justify the statement by explaining all the components of client/Server architecture CO2

b Explain the term Client/Server also explain the forces that drive the Client/Server.

Q4 (1x10 = 10 Marks)

a Describe in detail the client/Server principles.

b explain the term Client and its types. CO2

Q5 (1x10 = 10 Marks)

a Explain in brief the types of Servers with a neat diagram

b Explain in brief the terms Static Web Maps and Dynamic Web Map. CO2
