M. B. A, (FIRST SEMESTER)
MID SEMESTER EXAMINATION, 2019

MANAGEMENT PROCESS AND ORGANIZATIONAL BEHAVIOUR

rate : 1 : 30 Hours

Maximum Marks

Note :(i) Both Sections (A and are compulsory.

(ii) Answer any *two* sub questions among (a), (10 and (c) in each main question of Section A.

(HOAR questions in case study are compulsory.

(iv) Total marks for each main question are ten:

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2x5=10 Marks)

(a) How do you define management ? How do the required managerial skills differ hi the organizational hierarchy ?

(b) "Every manager is concerned with ideas, things and people." Comment.

(c) Briefly explain the levels of management.

2. A tmty i Pis Of choice from (a), (b) and (c). (2×5=10 Marks)

(a) What is the difference between productivity, effectiveness and efficiency

(b) Is management a science or art ? Explain with examples the nature of management.

(c) Why has Frederick Taylor been called the fatherbf scientific management and Henri Fayol the father of modern management theory ?

3. Attempt any *two* parts of choice from (a), (b) and (c). (2x5=10 Marks)

(a) Write short notes on the following

(i) Division of work

(ii) Scalar Chain

(b) Distinguish between management process, principles and practices.

(c) How the system approach to management indifferent from contingency approach ?

4. Attempt any *two* parts of choice from (a), (b) and (c). (2x5=10 Marks)

(a) Differentiate between Unity of Command and Unity of Direction.

(b) Explain the concept of Corporate Social Responsibility, with examples.

(c) Write short notes on the following :

(i) Interpersonal Roles

(ii) Informational Roles

Section—B

2. Case Study : (10 Marks)

The general manager has hired the services of a personnel manager but has purposely not defined the newcomer's role in the organization. You, a line supervisor, have become involved in several arguments with this personnel administrator when he attempted to relieve you and other supervisors of the authority, for transferring and promoting employees, changing wage rates and other matters on which he should be only advising line management.

But you feel that he does not have the proper perspective for his job and that he is trying to take over more and more power in order to create a good job for himself and a favourable impression on the management .You have mentioned this grabbing of authority by the manager, to your boss and have asked him to define the managers job.

e boss has answered that he is allowing, the manager to find his Own footing in the organization. You feel that the =Mk of the people in your depart s will suffer unless the manager's position is made clear.

Questions :

(i) Discuss the situation in the manager's viewpoint. Is it desirable to allow the manager to find his own footing in the organization ?

(ii) Develop a practical working relationship based on the principles of good organization.

MBA-102

M. B. A. (FIRST SEMESTER)
MID SEMESTER EXAMINATION, 2019
MANAGERIAL ECONOMICS

Time : 1 :30 Hours

Maximum Marks : 50

Note :(i) Both Sections (A and B) are compulsory.

(ii) Answer any *two* sub questions among (a), (b) and (c) in each main question of Section A.

(iii) All questions in case study are compulsory.

(iv) Total marks for each main question are ten.

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2X5=10 Marks)

(a) What is GDP and why is it given so much importance ?

(b) Explain the short-run trade-off between inflation and unemployment, with diagram.

(c) Is printing more and more money a solution to all economic problems ? Analyze and discuss.

2. Attempt any *two* parts of choice from (a), (b) and (c). (2 x5=10 Marks)

(a) Discuss the basic problems of a firm addressed by economics.

(b) Analyze the relationship between Total, Marginal and Average values in economic analysis, with suitable diagrams.

(c) How can the idea that utility is measurable help to explain a downward (negatively) sloped demand curve for a product ?

3. Attempt any *two* parts of choice from (a), (b) and (c). (2x5=10 Marks)

(a) Differentiate between Change in demand and Change in quantity demanded, with suitable diagrams.

(b) Discuss the relevance of elasticity of demand for a firm. Support your answer with suitable example.

(c) Consider the following demand function, and answer the questions that follow.:

Price (₹)	Qty. demanded (units of X)
20	100
30	90

(i) A 10 Rupees change in price brings a 10 unit change in the quantity demanded of X Is this a case of unitary elasticity ? If not, support your answer with reason.

(ii) Calculate the price elasticity of demand for product X

4. Attempt any *two,* parts of choice from (a), (b) and (c). (2 x5=10 Marks)

(a) Explain the concept of preference and indifference using indifference curves.

(b) Why are Indifference curves negatively sloped and convex ? Explain with diagram and reason.

(c) Illustrate, how a change, in price of a normal good affects the demand for the same good and other good, using indifference curves.

Section—B

5. Case Study : (10 Marks)

Estimates of elasticities of demand are generally derived from modeling demand using regression analysis. An example of the outcomes for such studies is given below using petrol as its subject.

Companies make estimates of own price elasticities of demand for their products. Likewise, academic economists undertake similar studies and many have been undertaken for products, such as alcoholic drinks, petrol and tobacco products, which governments many countries tax heavily, in expectation that demand is inelastic.

Goodwin (1992) surveyed a number of studies of the elasticity of demand for petrol He found that in the short run — a period of less than 1 year–the average elasticity of demand estimated using time series data was _0.27 and cross-section data _0.28. In the long run — a period of 5 or more years — the elasticities were higher but still less than 1. Using time series data the estimate was _0.71 and using cross-section data - 0.84. The results confirm that, overall, the price elasticity of demand for petrol is less than 1 and can be described as inelastic.

However, although the overall elasticity for the market as a whole is less than 1, the own price elasticities for individual companies might be expected to be higher. A price advantage for one petrol station in a neighbourhood may significantly increase the quantity demanded

that outlet by attracting customers who might normally go to another station if the prices were the same. Petrol is a homogeneous product bought partly on the basis of price and partly on the basis of convenience in terms of petrol stations passed. A small price differential may only work if the consumer finds it convenient to stop at the cheaper one To encourage people to visit the same petrol station irrespective of price, oil companies engage in promotional activities to promote brand loyalty.

Questions

(i) What makes demand for petrol inelastic ? Analyze the role of time on the elasticity of demand for petrol.

(ii) Discuss the strategies adopted by individual companies for increasing sales, when the product is homogeneous and market demand of petrol is already inelastic.

M. B. A. (FIRST SEMESTER)

MID SEMESTER EXAMINATION, 2019

BUSINESS COMMUNICATION

Time : 1 : 30 Hours

Maximum Marks : 50

Note :(i) Both Sections (A and B) are compulsory.

(ii) Answer any two sub questions among (a) (b) and (c) in each main question of Section A.

(iii) All questions in case study are compulsory.

(iv) Total marks for each main question are ten.

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) "Communication is necessary to business as the blood stream is to a person." Discuss.

(b) Discuss the important barriers to communication.

(c) Write an essay in the intern f communication and self-development.

2. Attempt any two pasta choice from (a), (b) and (c) (2×St Marks)

(a) Explain the process of communication through a diagram depicting the essential components of the process.

(b) Discuss in brief the ?C's of communication.

(a) Differentiate between verbal and non-verbal communi

Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) What is listening ? Mention some ways in which a person can learn the art of listening.

(b) What is grapevine communication ? Discuss its advantages and disadvantages.

(c) What are the two Major forms of non-verbal communication ? Explain each.

4. Attempt any *two* parts of choice from (a), (b) and (c). (2 x5=10 Minks)

(a) in brief the SQ3R technique of reading.

(b) Discuss the different channels of communication in an organization.

(c) List out few important etiquettes to be followed *while* using e-mail, phone and video conferencing for communication.

Section—B

5. Case Study : 00 Marks)

A multi-national organisation operates in various countries including Austral* Vietnam, India, Oman and Nigeria The organisation manufactures and distributes agricultural equipment to local and international clients. In total the organisation has 8,000 employees in five countries and more than 1 million customers worldwide. The head office is based in Australia. In recent years the organisation is facing several challenges.

They include :

(1) Ineffective use of social media such as blogs, wikis, social networks to support teams in sharing ideas, building knowledge bases and task management.

(2) Lack of quality feedback from clients on ways to improve product quality and service delivery.

(3) Misunderstandings and lack of trust based upon intercultural communication issues in different contexts.

Your manager has asked you to develop strategies and plans to come over these challenges.

Questions :

(i) What in your opinion is the problem in the organization ?

(ii) Discuss your plan, of action to overcome them.

MBA–105

M. B. A. (FIRST SEMESTER)
MID SEMESTER EXAMINATION, 2019
MARKETING MANAGEMENT
Time :1 : 30 Hours

Maximum Marks : S0

No :(i) Both Sections, (A and **B)** are compulsory.

(ii) Answer any *two* sub questions among (a), (b) and (c) in **each main** question of Section A.

(iii)All questions in case study are compulsory.

(iv) Total marks for each main question are ten.

Section—A

1. Attempt any *two* parts of choice from (a), (b) and **(c).** (2x5=10 **Marks)** –

(a) What were the inherent limitations of traditional marketing thought ? How were they addressed in the evolution of the

modern marketing concept ? How has technology influenced this change in thought ?

(b) Air India (AI) is a major Indian carrier. Use the five forces and PESTLE models to scope out the various external forces AI faces.

(c) Does marketing exist solely to increase profit ? If this is the case, then marketing in non-profit organizations can be said to be useless. Discuss.

2. Attempt any *two* parts of choice fro (b) (c). (2x5=10 Marks)

(a) Review the marketing management philosophies *and* explain which philosophy the entrepreneurs should adopt if they intend to successfully market the virtual marketing concept in INDIA.

(b) How has the internet and mobile marketing affected marketing practices in India ?

(c) What is Management Information System Explain, *why* there is need of Marketing Information System when we have Management Information System.

3. att*empt any two* parts of choice from (a), (b) and (c). (2x 5=10 Marks)

ibe the marketing concept and that concept is the most ciple =3n doing business of 4* your answer.

(b) of the best o tions to expand business operations internationally." Critically analyze this statement.

(e) What is Marketing Plan and =plain different strategies used *in* it

4. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) Evaluate the value to the consumer and value to the company, obtained from a service provider and identify the factors which contributed to the high or low value to consumer and company.

(b) Describe briefly 3B Model of consumer behavior and compare it with Organizational Buying Process.

(c) 'Marketing is more than the customer orientation.' Critically evaluate the statement, with the examples from the real world.

Section—B

5. Case Study : (10 Marks)

Three companies named 123,. ZOT & XYZ has their presence in three different market i.e. MI M2, & M3 with their product PI, P2, & P3. They are competing to each other in different segment markets. All firms are desperate to explore or enter into new segment market using STP approach. Every firm wants to go from single concentrated market to full coverage market : given

Product/Market	Market M1	Market M2	Market M3
Product P1	123/ZOT	ZOT	ZOT
Product P2	123	XYZ	
Product P3	123		

Question : Describe present market position standing of three different companies 123, ZOT, and XYZ. And explore all promotional opportunity analysis for any one company.

MBA--106

M. B. A. (FIRST SEMESTER)

MID SEMESTER EXAMINATION, 2019

BUSINESS ANALYTICS

Time : 1 : 30 Hours

Maximum Marks : 50

Note :0) All questions are compulsory.

(ii) Answer any *two* sub questions among (a), (b) and (c) in each main question of Section A.

(iii) All questions in Case Study • are compulsory.

(iv) Total marks for each main question are ten.

Section—A

Attempt any *two* parts of choice from (a), (b) and (c). (2x5=10 Marks)

(a) What do you understand by the term Industry 4.0 ? Compare and contrast it with Industry 1.0, 2.0 and 3.0.

(b) Soft drinks are sold in three *sizes* at a fast-food restaurant small, medium and large. Explain in detail the type of scale we should use to describe the size of the soft drink along with its main properties.

(c) Define the following terms :

(i) Business Analytics

(ii) Web Analytics

2. Attempt any *two* parts of choice from (a), (b) and (c). (2x5=10 Marks)

(a) Discuss in detail the evolution of Business Analytics. Also differentiate between the roles of Data Engineer and Business Analyst highlighting the and the key skills and responsibilities required for both the roles.

(b) For each of the following variables, determine whether the variable is categorical or numerical. If the variable is numerical, determine whether the variable is discrete or continuous. In addition, determine the level of measurement for each of the following :

(i) Name of Internet provider.

(ii) Amount of time spent surfing the Internet per week.

(iii) Number of e-Mails received in a week.

(iv) Number of online purchases made in a month.

(c) Differentiate between Descriptive, Diagnostic, Predictive and Prescriptive Analytics with suitable real life examples.

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) Define the following tents :

(i) Discrete and continuous variables

(ii) Sample and Parameter

(b) A categorical variable has three categories with the following frequencies of occurrence :

Category	Frequency
A	13
B	28
	9

Construct a bar and pie chart for the above data.

(c) The owner of a departmental store is hopeful that his sales are rising. Treating the sales for the previous 6 weeks as typical example of this rising trend he recorded them in 1000 and analysed the results

Week	
	2M
	2.62
	2S0
4	2.70
5	2.75
6	241

(i) Fit a linear regression equation to suggest him the *weekly* rate at which the sales are rising.

(ii) Use this equation to estimate expected sales for the seventh week.

4. Attempt any *two* parts of choice from (a), (b) and (c). **(2X5=10 Marks)**

(a) From the following information on the number of defective components in 1000 boxes calculate the arithmetic mean of

defective components for the whole of the production line :

No. of Defective Components	No. of Boxes
	25
1	306
2	402
3	200
4	51
5	10
6	6

(b) The •following set of numbers represents mutual fund prices reported at the end of the week for selected 40 nationally sold funds

10	25	15	34
17	26	18	13
15	32	24	10
22	14	36	16
11	17	18	20
16	20	15	22
19	23	21	19
24	27	2$	29
29	30	33	23
18	12	38	31

Arrange these prices into a frequency distribution having a suitable number of classes.

(c) Discuss the concept of Simple Linear Regression with suitable examples.

Section–B

(ii) Marks)

5. Case Study :

Consumer goods giant Procter and Gamble (P&G), the maker of such well-known brands as Tide, Olay, Crest, Bounty and Pampers, sells its products in over 180 countries around the world. Supply chain co-ordination and efficiency are critical to the company's profitability. After many years of, acquisitions and growth, P&G embarked on a effort known as Strengthening Global Effectiveness. A major piece of that effort was the North American Supply Chain Study, whose impose was to make the supply chain in North America as efficient as possible, while ensuring that customer service requirements were met.

A team of P&G analysts and managers partnered with a group of analytics faculty at the University of Cincinnati to create a system to help managers redesign the supply effort in North America. The fundamental questions to be answered were :

(a) Which plants should make which product families ?

(b) Where should the distribution centers be located ?

(c) Which plants should serve which distribution centers ?

(d) Which customers should be served by each distribution center ?

The team's approach utilized all three categories of business analytics : descriptive, predictive and prescriptive. At the start of the study, data had to be collected from all aspects of the supply chain. These included demand by product family, fixed and variable production costs by plant, and freight costs and handling charges at the distribution centers. Data queries and descriptive statistics were utilized to acquire and better understand the current supply chain data. Data visualization, in the form of a geographic, information system, allowed the proposed solutions to be displayed on a map for more intuitive interpretation by management. Because the supply chain had to be redesigned for the future, predictive analytics was used to forecast product family demand by three-digit zip code for ten years into the fame. This future demand was then input, along with projected freight and other relevant costs, into an interactive optimization

model, that minimized cost subject to service constraints. The suite of analytical models was aggregated into a single system that could be run quickly on a laptop computer. P&G product category managers made over a thousand runs of the system before reaching consensus on a small set of alternative designs. Each proposed design in this selected set was then subjected to a risk analysis using computer simulation, ultimately leading to a single go forward design.

The chosen redesign of the supply chain was implemented over, time and > led to a documented savings in excess of $ 250 million per year in P&G's North American supply chain. The system of models wan later utilized to streamline the supply chains in Europe and Asia and P&G has become a world leader in the use of analytics in supply chain management

(i) Discuss, how was the key concepts of Business Analytics were utilized by P&G to improve their core processes ?

(ii) What was the key output of the action taken by the organization ?
