MID SEMESTER EXAMINATION, 2021

PRIVACY, ETHICS AND REGULATIONS IN AI

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

P. T. O.

53

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks) (CO1 and CO2)

   (a) Explain the differences between an agreement and a contract with a suitable example.

   (b) Describe the Competition Act, 2002 in detail.

   (c) Define agency law with suitable examples.

2. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks) (CO1 and CO5)

   (a) What is value in the context of business ? Explain the human values in detail.

   (b) What is business ethics ? Define the nature of business ethics.

   (c) What is the importance of policy and regulatory approach in artificial intelligence and data sciences ?

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks) (CO2 and CO3)

   (a) What is ethics ? Describe the determinants of ethics in artificial intelligence.

(b) Write the importance of intellectual property protection in artificial intelligence and data sciences.

(c) Define artificial intelligence with suitable examples.

Section—B

4. **Case Study :** (20 Marks) (CO5)

X agrees to pay Y ₹ 1,00,000 if Y kills Z. To pay Y, X borrows Rs 1,00,000 from W who is also aware of the purpose of the loan. Y kills Z but X refuses to pay Y. X also refuses to repay loan to W.

(a) Define and justify the kind of agreement that exists between X and Y.

(b) Advise Y and W based on recovery.

DATA VISUALIZATION FOR MANAGERS

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

P. T. O.

74

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) Explain the criteria behind effective visualization colour choices. (CO1)

   (b) What makes a visualization memorable, explain through figure and what are three stages of understandings ? (CO1)

   (c) What are the Tufte Principles of Graphical Excellence ? (CO2)

2. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) What are the three principles of good design given by Andy Kirk (2016) ? (CO1)

   (b) What are the five big data challenges and how to overcome with it through visual analytics ? (CO2)

   (c) Compare and contrast the charts which we use to represent the relationship and distribution. Explain it with figure. (CO3)

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) What is top-down processing theory and how psychologist Gregory explains this ? (CO1)

(b) What are the four stages of Visualization Workflow ? (CO2)

(c) What are the ten steps to create a good infographic ? (CO3)

Section—B

4. Design a chart by using Cleveland and McGill (1984) provided visual ratio on below data, and tell a story of these numbers : 20 Marks (CO4)

Rathfarnham Station	2016	2017	% Change	% Detection Rate
Burglary	332	311	– 6%	5%
Robbery				
Robbery from the Person	13	9	– 31%	22%
Robbery from the Establishment	5	12	+ 140%	17%

Theft				
Theft from the Person	19	35	+ 84%	3%
Theft from MPV	231	187	– 19%	2%
Theft from Shop	195	224	+ 15%	49%
Theft (Other)	156	125	– 20%	13%
Theft of MPV	49	56	+ 14%	11%
Property Crime	1074	1048	– 2%	16%
Theft/UT of Pedal Cycle	50	75	+ 50%	7%

BIG DATA ANALYTICS

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

P. T. O.

116

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) Sketch out DIKW, Support your answer by taking a real world example. (CO3)

   (b) Discuss the top 05 Vs of any Big Data Project. (CO2)

   (c) Examine how big data analytics can add value to your business. (CO4)

2. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) Articulate possible data cleaning activities in a typical data driven project. (CO5)

   (b) Why is analysis of data required by any data driven companies ? (CO4)

   (c) Discuss challenges or issues in Big Data. (CO2)

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) Design a Big Data Solution for an e-commerce site. (CO6)

(b) Write in any top 02 use case for data analytics. (CO4)

(c) What could be the main elements involving in designing and developing better data use case ? (CO1)

Section—B

4. You are a food lover and often visit a restaurant. Consider a situation where a mail pops up in your inbox with the subject title "We missed you!" or "We have been wondering why you haven't been in for a while" if you haven't visited or used their services for more than a month. Examine importance and fitness of each Big Data Stack Layer helping restaurant to target right customer. Support your answer with required analytics being used by the restaurant owner for this purpose. (20 Marks) (CO6)

FINANCIAL PLANNING

Time : 1½ Hours

Maximum Marks : 50

Note : (i) Answer all questions by choosing any *two* of the sub-questions.

(ii) Each question carries 10 marks. Case study carrying 20 marks.

Part–A

1. (a) Explain the need of investment and different avenues of investment.

(b) Explain time value of money and impact of compounding on investment.

(c) Explain requirement of financial planner in wealth management.

5×2=10 Marks (CO1)

P. T. O.

2. (a) Define impact of thirty years of liberalization on Indian economy.

   (b) Define Primary market and Secondary market.

   (c) Explain procedure of listing of a company in stock market since its inception.

5×2=10 Marks (CO1)

3. (a) Explain the different stages of financial planning.

   (b) Define impact of age, financial literacy and family responsibility in financial planning.

   (c) Suggest plan of action about financial awareness among rural population.

5×2=10 Marks (CO2)

Part—B

4. **Case Study :** (20 Marks)

Young married couple with children—planning their future children : 2

Job Position :

Pratham—Director of Engineering

Rita—Stay at Home Mom (a health care consultant in hiatus)

Pratham was recently promoted earlier this year as Director of Engineering for a very large oil and gas exploration firm in Farmington, NM. His salary is $ 150,000 per year plus substantial bonus opportunities and equity share of the firm. Rita is a graduate of an East Coast Liberal arts college specializing in health care issues. She has worked as a consultant and now she is a full-time mom. They are devoted to their family and live well within their means. They have accumulated a substantial balance in their checking account. As a family they enjoy camping in the mountains in South-west Colorado.

Question :

Create financial planning road map for above case. Your suggestion should follow strong logics and facts.

MARKETING ANALYTICS

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

P. T. O.

145

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks) (CO1, CO2, CO3)

   (a) Explain various aspects related to the marketing analytics in detail with an example.

   (b) "Marketing analytics capabilities are in high demand by the organizations." Critically analyze the statement.

   (c) Successfully implementing marketing analytics is a challenging task. Being a marketing analyst what kind of challenges may you expect and how will you overcome them ?

2. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks) (CO1, CO2, CO3)

   (a) Explain marketing analytics process in detail. Use any product (goods or service) of your choice to justify the process.

   (b) Discuss marketing models in detail. In your opinion which marketing model is best suited at B2B (Business to Business) level ?

(c) "Cluster sampling and clustering technique refers to same phenomenon." Critically review the statement.

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks) (CO1, CO2, CO3)

(a) Discuss the methodology involved in hierarchical clustering. Why is it known as the fundamental approach for clustering ?

(b) Explain K-NN clustering approach. What does K signify in K-NN and how can optimal number of clusters be found by K-NN approach ?

(c) Discuss the significance of Multidimensional Scaling technique for data analysis with an example.

Section—B

4. **Case Study :** 20 Marks (CO4, CO5, CO6)

Performance Solutions Group or PSG, is a small leadership consulting business located in Mount Juliet, Tennessee and was founded in 2011.The company focuses all trainings on the

commercial truck and tire business, as the owner has previously worked in that industry. PSG offers six different products to grow sales, build teams and develop leaders. The offerings are QBQ! Question Behind the Question Personal Accountability Training, Burl Assessments, GiANT Worldwide Leadership Modules, Keynote Events, Telenotes Productivity System, and the Leadership Coaching Development Program. The company founder, Chad Miller, wants to focus future sales on Telenotes Productivity System and the Leadership Coaching Development Program. Telenotes Productivity System, referred to as simply Telenotes, is a customer relationship management tool (CRM). Instead of the salesman typing notes at the end of the day, Telenotes allows salespersons to call into the system, speak their notes, and an employee transcribes the verbal notes by 5 AM the next

morning. The salesman can give company names, contact names and numbers and call notes that will be saved on the Telenotes system for easy access. The selling point of this product is increased sales productivity throughout the week. On average, salespeople can make roughly one more sales call per day, increasing customer contact by about 250 points throughout the year. Currently, Telenotes is the largest contributor to revenue for Performance Solutions Group. The Leadership Coaching Development Program, or LCDP, is a six module custom training workshop focused on developing leaders worth following. Each module is one day long, once a month. This program gives leaders of the company tools to take back to their teams and increase teamwork. Currently, LCDP is the second largest contributor to revenue for Performance Solutions Group.

Question :

Mr. Miller would like to make LCDP as the largest contributor of company for revenue over the next few years. What would you suggest Mr. Miller as a marketing manager to make it happen ?

INTRODUCTION TO SUPPLY CHAIN MANAGEMENT

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

P. T. O.

147

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) Define supply chain management. What are the objectives of supply chain management ? (CO1)

   (b) How do you define stock-keeping unit keeping in mind the supply chain ? (CO2)

   (c) What is the role of logistics in supply chain management ? (CO1)

2. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) What is the role of supply chain management in creating and adding value for customers ? (CO2)

   (b) Differentiate between supply chain management and logistics. (CO1)

   (c) Why has supply chain management emerged as a field of important study and practice ? (CO2)

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) How does supply chain management impact the bottom line of the business organization ? (CO2)

(b) What is the driving force behind the supply chain concept ? (CO2)

(c) Think of any organizations you are familiar with (e.g., Kroger, Target, Procter & Gamble, IBM, Exxon Mobil, Pizza Hut) and then graphically display their supply chain networks (or develop a detailed supply chain map for your organization). (CO1)

Section—B

4. **Case Study :** (20 Marks) (CO1 & CO2)

The Benetton supply chain :

One of the best known examples of how an organization can use its supply chain to

achieve a competitive advantage is the Benetton Group. Founded by the Benetton family in the 1960s, the company is now one of the largest garment retailers, with stores which bear its name located in almost all parts of the world. Part of the reason for its success has been the way it has organized both the supply side and the demand side of its supply chain.

Although Benetton does manufacture much of its production itself, on its supply side the company relies heavily on 'contractors'. Contractors are companies (many of which are owned, or part by Benetton employees) that provide services to the Benetton factories by knitting and assembling Benetton's garments. These contractors, in turn, use the services of sub-contractors to perform some of the manufacturing tasks. Benetton's manufacturing operations gain two advantages from this. First,

its production costs for woollen items are significantly below some of its competitors because the small supply companies have lower costs themselves. Second, the arrangement allows Benetton to absorb fluctuation in demand by adjusting its supply arrangements, without itself feeling the full effect of demand fluctuations.

On the demand side the chain, Benetton operates through a number of agents, each of whom is responsible for their own geographical area. These agents are responsible for developing the stores in their area. Indeed, many of the agents actually own some stores in their area. Products are shipped from Italy to the individual stores where they are often put directly onto the shelves. Benetton stores have always been designed with relatively limited

storage space so that the garments (which, typically, are brightly coloured) can be stored in the shop itself, adding colour and ambience to the appearance of the store.

Because there is such limited space for inventory in the stores, store owners require that deliveries of garments are fast and dependable. Benetton factories achieve this partly through their famous policy of manufacturing garments, where possible, in greggio, or in grey, and then dyeing them only when demand for particular colours is evident. This is a slightly more expensive process than knitting directly from coloured yarn, but their supply-side economics allow them to absorb the cost of this extra flexibility, which in turn allows them to achieve relatively fast deliveries to the stores.

Questions :

(i) Brief your understanding about Benetton Supply Chain operations. In your understanding, what is the speciality of Benetton's contractors ?

(ii) Does this method provide Benetton competitive advantage over their competitors ? Is this method sustainable in the long term ?

4. **Case Study :** (20 Marks) (CO4, 5, 6)

Coca-Cola introduces new brand platform as it vows to take a stand on social issues

Coca-Cola is launching a new brand purpose, Better when we're open', in Europe that will

form the basis of its marketing this year and next as it looks to show it is a brand with a point of view.

Coca-Cola is launching a brand platform and purpose across Europe as it looks to become a brand that has a point of view and create more empathy among consumers. The positioning, 'Better when we're open', aims to act as a rallying call to unite the world that it believes is becoming increasingly divisive. That will be part of the brand's marketing platform across Europe.

Speaking at an event in February 2020 Coca-Cola's Western Europe marketing director Walter Susini said : "There is a fundamental truth that no matter where you look today, in any country around the world, we are more divided than ever. Coca-Cola is a brand that needs to embrace different angles and facets, and we need to talk about the problems that are

relevant today. We will never shy away from social issues."

The new purpose is "an evolution" from 'uplift and unite', which was launched last year, and will be communicated across various brand campaign throughout this year and into 2021. It builds on Coca-Cola's Christmas ad, which drew parallels between Father Christmas and migrants.

The first is a TV campaign, created by Wieden + Kennedy London, that calls on consumers to listen more to different opinions and ask, "Could I be wrong ?" The ad launches next week in the UK and shows a hectic US city environment aimed at reflecting the world we currently live in. It shows people shouting and screaming about who is right and who is wrong. As the disagreements escalate, physical cracks appear in the architecture and the scene begins to crumble around the people, who are somehow oblivious to the destruction. Finally Orange is the New Black Star, Natasha Lyonne, appears and says : "What if we all

asked ourselves, 'Could I be the one who's wrong ?' Maybe things would change for the better."

The ad "is just the beginning of how we going to deliver this empathy platform", according to Susini. It will appear across its activations at the Euro 2020 tournament this summer and as a core part of its strategy to create more links between Coca-Cola drinks and mealtimes as it tries to branch out into more occasions.

Susini admitted that marketing is "facing a difficult moment" as the market and consumer touchpoints become more complex.

However, he believes Coca-Cola can stay relevant in three key ways : purpose, experience and talkability. He explained : "You need to talk about your purpose (besides making money for your shareholders) and you need to create an experience. And lastly you need to create talkability. If you don't care you don't share."

Susini concluded : "We have been around for so long because we have never been indifferent and we will continue not to be."

Questions :

(i) What do you understand with the phrase– 'marketing is facing a difficult moment as the market and consumer touch points become more complex' ? Elaborate on the evolving forms and growing complexity of touch points in the present times.

(CO4, CO5)

(ii) Analyze and discuss the role of purpose, experience and talkability in making a brand like Coca-Cola relevant. Propose a campaign theme and strategy for Coca-Cola different from those mentioned in the extract. (CO5, CO6)

   (c) What are the location advantages that should be considered in deciding the warehouse location ? (CO2)

Section—B

4. **Case Study :** (20 Marks)

The **Nestlé Cocoa Plan** aims to help farmers address the challenges they face through three pillars—better farming, better lives and better cocoa. Activities such as training in better agricultural practices, distributing higher-yielding plants, promoting gender equality and tackling child labour help farmers to improve the quality of their products as well as their income and livelihoods.

In Ecuador, the **Nestlé Cocoa Plan** is helping farmers transform their business models and become agripreneurs. Their training program, launched in 2017, comprises 15 four-hour sessions over six months. The sessions provide theoretical and practical skills in areas such as irrigation, fertilization, pruning and grafting, all of which help farmers improve their productivity and quality. Of more than 370 farmers trained so far, around 30% are under the age of 30 and 20% are women. A survey conducted on a sample of around 100 attendees of the 2017 and 2018 program showed that 40% had provided services and said their income had increased since the program.

One such young agripreneur is Wilson Matamoros, 24, who works on his family's farm in Mocache, Los Ríos province. Having learned pruning techniques through Nestlé program, he has increased the cocoa yield on the family farm and offers cocoa pruning services to other local farms, earning additional

income. He now aims to become the leader of a group of cocoa pruners in the region.

Nestlé objectives : By 2025, Source all cocoa for Nestlé confectionery through the **Nestlé Cocoa Plan**.

Questions :

(i) Identify the nature of supply relationship that Nestlé has tied up with the farmers in Ecuador. (CO2)

(ii) Do you feel that given this kind of relationship, Nestlé can become a monopoly in cocoa procurement ? Why or why not ? (CO4)

50
