MID SEMESTER EXAMINATION, 2021

STRATEGIC MANAGEMENT

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) What is the concept of strategy ? (CO1)

P. T. O.

(b) Can we characterize the development of strategic management in India promising ? If yes, then why / if not, then why not ? (CO1)

(c) Enumerate the elements in the strategic management process. (CO1)

2. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) Describe the different levels at which strategy operates. How is integration of strategies operating at different levels done ? (CO2)

(b) Apply the strategic management model to your own case. Follow the process and identify the different elements such as your vision and mission, career objectives, your self-appraisal and the opportunities and threats operating in the job market, the career advancement strategies that you choose and how you would implement these strategies and evaluate your

performance. Describe what you have thought systematically according to the different phases of strategic management. (CO2)

(c) What is meant by 'strategic intent' ?(CO2)

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) In what terms can a business school set its objectives ? A graduate aspiring for MBA admission ? (CO3)

(b) Suggest a business model of an online real estate marketing company in India (such as magicbricks.com or 99acres.com) interested in optimizing its advertisement sales revenue from builders and brokers. (CO3)

(c) Through the use of suitable examples discuss which sectors of environment are currently relatively more important, in general, in the Indian context ? What sectors are likely to gain importance in the near future ?

Section—B

4. Case Study : 20 Marks (CO4, CO5 and CO6)

The 'LPG' of the Economic Environment in India

By 'LPG', as colourfully stated by the once-redoubtable former chief election commissioner T. N. Seshan, is meant liberalisation, privatisation and globalisation. You often hear these terms and might have an idea of what they mean. Let us see the meaning of these terms in the context of the Indian economic environment.

Liberalisation refers to a set of measures and reforms aimed at the creation of an open economy. Broadly, the economic policies talk of liberalisation measures for industry and trade and reforms related to the macro aspects and structural adjustments.

Liberalisation measures encompass the following :

(i) Industrial policies related to liberalisation of licensing of companies, foreign exchange and its regulation, monopolies and restrictive trade practices and the public sector reforms.

(ii) Trade policies related to liberalisation through encouragement of foreign investments, opening of exports and imports sectors, lowering of import tariffs, abolition of import licensing and convertibility of rupee.

The reforms process includes :

(i) Fiscal (say, reduction of fiscal deficit and reform of taxation system), monetary (say, lowering interest rates and controlling inflation), banking sector (say, freeing

interest and lending rates and entry of private banks) and capital market reforms (say, entry of private sector mutual funds and allowing foreign institutional investors in capital markets).

(ii) Structural adjustments related to phasing out of subsidies and price controls, disinvestment in public sector units and framing of an exit policy for industry.

The ongoing reforms process, often referred to as second-generation reforms, include further financial sector reforms, several legislative actions such as amendments to the Companies' Act, setting up of Competition Commission and tax reforms related to value-added tax and stricter compliance.

Privatisation refers to the process of selling of state-owned enterprises (or public sector units as we call them) to private individuals or

corporations. In a limited sense, it also means the hiring of a private business to provide products and services previously offered by a government agency. Liberalisation in the shape of public sector reforms, for example, entails disinvestment of government equity in public sector units, resulting in their privatisation.

Globalisation means the integration of a country's economy with the global economy. This is done in several ways like enhancing the inward flow of foreign funds and technology, opening up the system of trade and investments and, in general, the internationalisation of markets, production and corporations. Operationally, it means that a company that could earlier be successful by focusing only on making and selling goods and services within its national boundaries, now expands its horizon to the world.

Questions :

(a) Do you think that the three terms– 'Liberalisation', 'Privatisation' and 'Globalisation' are mutually exclusive in terms of their coverage ? Discuss.

(b) How have these three developments created the need for more focused strategic management by Indian companies ? Explain with examples.

BUSINESS ETHICS AND CORPORATE GOVERNANCE

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

P. T. O.

52

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) What is ethics and what is not ethics for the proper understanding of it ? (CO1)

   (b) Analyze the need for incorporating ethics into businesses. (CO3)

   (c) Explain the *six* stages of ethical consciousness embraced by businesses. (CO2)

2. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) What are the *six* characteristics of ethical decision-making ? Briefly explain. (CO2)

   (b) Justify as managers you owe a responsible towards creating ethically clean environment for mankind. (CO4)

   (c) Highlight the unethical practices in the realms of product/service pricing. (CO2)

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) Explain any *two* legislations for safeguarding the interests and concerns of the consumer. (CO1)

   (b) Discuss briefly the various unethical practices prevalent in Banking and Insurance sector. (CO3)

   (c) Why does bribery and coercion feature as unethical practices ? Comment. (CO2)

Section—B

4. **Case Study :**

Coca-Cola Company has been facing many issues concerning racial discrimination of employees across the globe. Coke's reputation experienced a significant blow when approximately. A lawsuit of over 2,000 recent and former workers, accused Coca-Cola firm of discriminating in areas of performance evaluation, promotion and payment. The workers complained of low payment, harassment and poor working conditions as compared to their white counterparts. The

protests resuited in increased national boycotts of Coke's products and services; thus, impacting the company's profits. The company's top leadership has been characterized by Americans, and this has created concerns over racial discrimination on leaders from other continents. Reasons why racial discrimination persists in the company-Coke continues to exercise ' racial discrimination of employees; the company values employees with American descent as more skilled in managing the company's activities as compared to workers from other regions of the globe. Consequently, the firm paid approximately $ 192 million to successfully settle the claims in 2018.

Channel stuffing is considered a deceptive enterprise practice being applied by an organization to significantly inflate earning figures and sales prices by deliberately sending the retailers along various distribution channels. Channel stuffing is significantly grimaced by the Securities and Exchange Commission (SEC) as an unethical practice

used by firms to accelerate the revenues to accomplish earning targets and short-term revenues. The practice misleads the investors and stakeholders of the company. Consequently, it adversely impacts the company since it cannot sustain sales and marketing at the stuffing rate. Moreover, it leads to inflated financial statement earnings, thus, misleading the stakeholders. Coke has been accused of increased channel stuffing of its products and services across the globe. In his article, Jenkins (2018), for instance, outlined that in the early 2000s, Coca-Cola was accused of increased channel stuffing and inflated earnings. Consequently, in 2004, the company was charged with hiring and sending excess concentrate to the Japanese bottlers to inflate its services and profits (Coca-Cola 2014) significantly. The company pressurized the bottlers to buy extra in exchange for extended credit. The more substantial discounts provided to increased channel stuffing activities impacted Coke's long-term viability across the globe. Nonetheless, despite settling

the allegations, SEC did establish that channel stuffing had been practiced by the organization.

The firm claims to observe ethical standards in all its operations. Nonetheless, the company's services and products across the world are severely polluting the environment. Coke is the leading polluter of the environment due to weak waste disposal mechanisms, higher water consumption and increased production of non-recycled packaging tools. Coke has been named the globe's leading polluter of the environment. The company produces over 2.9 million tonnes of plastic packaging that amounts to over 108 billion bottles per year. The plastics have not been renewable until many allegations by the World Health Organization (WHO) about weak disposal systems of the company. The company depends on water for increased production of various types of beverages; thus, without water, the company has terminated its plants in multiple regions. To ensure a continuous water supply, Coke is considering taking active

control of all aquifers in societies across the world. Due to the high demand for production, Coke is increasingly accused of dehydrating societies in its continuous pursuit of reliable water sources to sustain the plants. In his research, Subramanyam (2018) identified that Coke's activities are being blamed for severely aggravating water shortages in areas like Indian that suffer from adverse lack of rainfall and water resources. In India, the findings from Maharashtra and Kerala indicated that coke activities have severe adverse impacts on local communities and farmers after establishing the bottling plant in a Kaladera village. The area is being abandoned due to severely depleted water sources, and locals fear that it would soon become a dark zone. Nonetheless, Kerala High Court, in its final ruling, outlined that Coke heavy extractions from the essential underground water resources were unlawful. Subsequently, in 2003, the Centre for Science and Environment determined in its findings that soft drinks manufactured in India by Coke and other beverage firms indicated high levels

of pesticides that impacted some consumers. In Varanasi, India, Coke was accused of increasingly contaminating all groundwater due to waste water concerns. The company failed to establish an active pipeline to prevent contamination of underground water. In El Salvador, Coke has been exhausting all water sources, like wells and rivers; thus, damaging local agriculture hence declined in the source of income among farmers. However despite denying these allegations, coke sales and marketing in India declined temporarily by 15%; thus, reducing its competitive advantage over Pepsi.

Questions :

(i) Explain the unethical nature of discrimination. How can it be damaging for a business ? 10 Marks (CO4)

(ii) As a responsible professional what short-term and long-term remedial actions would you recommend for Coca-Cola ? 10 Marks (CO5)

SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections—Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) Describe the objectives of Investment and Portfolio Management. (CO1)

P. T. O.

73

(b) What is relevance of Variance/Standard Deviation for calculating company's risk ? (CO2)

(c) Discuss Portfolio Management Process. (CO1)

2. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) 'Default risk is higher in bonds.' Justify. (CO2)

(b) List the advantages of Financial System. (CO2)

(c) The return on two securities X Ltd. and Y Ltd. are as follows :

Return on Security X	Return on Security Y	Probability
12	10	0.5
6	4	0.4
0	6	0.1

Select securities on the basis of Risk and Return. (CO3)

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) "Few securities when combined together generate a portfolio effect but certain other when combined together does not generate a portfolio effect." In the light of this statement, explain the concept of portfolio effect by giving suitable examples. (CO1)

(b) Explain the fundamental indicators used by the Portfolio Manager in the quantitative evaluation for deciding a portfolio. (CO2)

(c) Describe the utility of unsystematic risk with examples. (CO3)

Section—B

4. **Case Study :** 20 Marks (CO2, CO3)

Construct a portfolio of two investments A Ltd. and B Ltd. Calculate the risk returns.

Which portfolio is best of given portfolios on basis of following information ?

Particulars	A Ltd.	B Ltd.
Expected Returns	14%	16%
Standard Deviation	6%	8%

Coefficient of correlation is – 1. Calculate Portfolio Return when :

(i) 50% of funds are in A and 50% in B.

(ii) 75% in A and rest in B.

(iii) All funds in A Ltd.

   (a) Discuss the factors affecting performance management.

   (b) What do you mean by performance planning ? Discuss its importance and process.

   (c) What is performance prism ? Explain its importance.

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks) (CO2)

   (a) Discuss the performance appraisal process.

   (b) Explain performance execution. Discuss the components and responsibilities of employees and employers.

   (c) Differentiate between traditional and modem methods of performance appraisal.

modern

Section—B

4. **Case Study :** 20 Marks (CO1 and CO2)

   Many employers offer incentives to employees working in different jobs. Often, the incentives are to reward employee performance, both in the short-term and the long-term. But some company incentive plans are viewed negatively by employees, while others are seen as highly positive by employees at all levels.

   One firm that has a well-regarded, broad-based incentive plan is Sodexo, a large food and facilities service firm with more than 3,50,000

employees in 80 countries. Being such a large firm, Sodexo has a variety of clients, including many corporate and governmental entities, hospitals, manufacturing firms and universities. Thus, the firm's client services are varied, with many of them being basic ones such as cleaning offices, maintenance of all types of facilities, doing landscaping and managing other basic and professional activities. In North America. including the United States, Sodexo has almost 1,25,000 staff members. More than 40,000 of the North American staff members work in health care, including clinics, offices and hospital sites.

Being such a large firm with employees doing many different types of jobs, a key part of Sodexo's organizational and HR cultures involves engaging its employees in many ways. One aspect is having a widely based employee rewards program containing

recognition and incentives. The company's "Spirit of Sodexo" program focuses on three general-award facets : service, teamwork, and progress. To operate this program, the company has required executives, including the top HR officer, to develop processes for the nomination of employees who make significant contributions, locally and regionally, as well as in business and corporate divisions of the firm.

Some of the recognitions and awards provided to employees are interesting. Because the biggest division of workers is in health care locations, a special incentive program called Sodexo CARES has been used for several years for employees who accomplish especially unique results. At one hospital, a small group of dieticians developed a new system for ordering medication and devices online, something that is not done in most hospitals. These dieticians received recognition

and incentive awards for their job-related accomplishments.

Another incentive reward for exceptional efforts went to a female employee who worked as a food caterer and prepared special meals for a young foreign hospital patient who had difficulty eating typical U.S. foods. The employee home cooked various items for that patient when the patient had surgery. Her efforts were increasingly recognized throughout Sodexo, and she received a national incentive award. Both she and her husband attended a national meeting in a different city where she was recognized and became the subject of a short video. She also received a $500 gift card and a lot of publicity.

Numerous other examples exist showing how Sodexo uses employee incentives as part of its culture in many different industry jobs.

Case Questions :

(a) Based on the Sodexo example, discuss the importance of widespread incentives in improving both the culture and employee retention efforts in a firm.

(b) How might having employees receive recognition and incentives at a national level impact the performance of their coworkers and colleagues ?

Section—B

4. **Case Study :** (20 Marks) (CO1 & CO2)

Cool-Heads : Re-Designing Sales Strategies

Cool-Heads was established in 2010 to manufacture, distribute and market

pharmaceutical soft drinks. It was purely an Indian company and had to face tough competition from multinational companies during the initial years. The company in the last decade with the help of effective market strategies, has set up a place for itself, amongst the leading pharmaceutical companies in the country.

In 2020, the Managing Director of the company stressed the need for diversification and addition of new products to its existing product range. He floated the idea of manufacturing and marketing coffee with milk, cocoa and sugar. His advisers suggested that such products enriched with cocoa, would be desirable, and should be a big success, especially in view of its competitor's brand. The marketing research department of the company also gave the green signal to the project after conducting a brief survey.

The company promoted its coffee with Choco-Coffee as the brand name. It was supplied in a 400 gm packet at a price of ₹ 75. The product was heavily advertised in the newspapers, health magazines, radio and television. The target audience was middle class, who it was believed could afford Choco-Coffee. Ordinary coffee was available in the market at a rate of ₹ 30 to ₹ 40 per kg. The thrust of Choco-Coffee in the promotion campaign was that this contained cocoa, milk and sugar.

The company has 50 stockists covering all of the country and has a sales force of about 150 representatives, for promoting its products, through supermarkets and shops. The representatives of the company had very good rapport with supermarkets and shops. To promote the coffee its representatives gave discount coupons to the stockists for passing

over to their customers to induce them to buy their coffee. The buyer was entitled to ₹ 5 discount per packet of 400 grams. The scheme continued for about 6 months.

Despite heavy advertisement and canvassing by its representatives, the product was unable to attract customers. It was observed that launching of its product has not affected the market position of other branded coffee at all which was being sold at ₹ 90 for a pack of 275 grams. Rather it was observed that these sales of the other brands of coffee increased marginally, consequent to the advertisement campaign by the Cool-Heads. The company could achieve only 25% of its sales target in the first year and it remained almost static for the next year.

Questions for Discussion :

(i) What do you think are the reasons for the failure of the company to achieve its target ? Suggest a sales promotion plan for increasing the sales volume of the company.

(ii) Can a change in the distribution channel bring improvements in the sale of the product ?

FINANCIAL PLANNING

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

P. T. O.

117

Section—A

1. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) Compare the constraints of financial planning which must be considered in Charli Delta phases of investment life cycle. (CO1)

   (b) Ms. Bipasa invested ₹ 20,000 in ABC Bank at a simple interest of 12% p.a. and also ₹ 20,000 in XYZ Bank at the same interest rate compounded monthly. Both are invested for a tenure of 3 years. At the end of third year, i.e., on maturity date, what will be the difference between the sum of amount received from ABC and XYZ bank ? (CO2)

   (c) As you move through the scope of financial planning from Cash Reserves to Equivalents to Income Assets to Equity Assets to Tangible Assets, what happens with relations of risk and return and why ? (CO2)

2. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) Define five parameters, which are used for estimation of current financial position of the client's assets. (CO1)

(b) Mr. Gupta an Indian resident, invests in Mutual Funds regularly. He has current value SIP of ₹ 2,00,000. In this SIP he is contributing ₹ 25,000 per month. This will continued for 12 more months. The yield on SIP is estimated to be 1% per month. Mr. Gupta is expecting some money and he is planning to start a new SIP of ₹ 12,000 per month for 18 months. This new SIP estimated yield is 1.25% per month. Mr. Gupta has a son named Pawan and he is planning to send Pawan to USA for his higher education. The expenses of such studies is ₹ 20,00,000 and this will go above by 10% per annum by next 5 years.

The rupee is also likely to depreciate by 3% against USD. What will be the value of Mr. Gupta on going SIP in one year ? Mr. Gupta Plan to start a SIP of ₹ 12,000 p.m. What will be value after one year ? (CO3)

(c) "A situation in which a professional adviser is offered an incentive to sell you a financial product that may not be in your best interests." Describe the 'conflict of interest' in between financial planner and client in this context. (CO3)

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) Develop set of variable in data templet for gathering the personal of Mr. Dinesh who is living with a six-member family (old age parents, working wife and school going kids). (CO3)

(b) Rita must choose between two job offers. She wants to select the job with a salary that will afford her the higher standard of living for the next few years. Job A offers a 3% raise every year, while Job B will not provide a raise for the next few years. If Rita chooses Job A, she will live in City A. If Rita chooses Job B, she will live in City B. Rita finds that the price of goods and services today are about the same in both areas. Prices are expected to rise, however, by 4% in City A every year, and stay the same in City B. Based on her concerns about standard of living, what should Rita do ? (CO3)

(c) Create a financial plan based on imaginary data for a middle income couple in age group of 35 – 38 years and having a single school-going child. (CO3 and 4)

Section—B

4. **Case Study :** 20 Marks (CO6)

Case on Analyzing and Customizing Financial Meet to Mr. Ram

Ram is 30, has recently gotten married to Sapna who is 27, and he and his wife are planning to have their first child in 3 years. He lives in a comfortable although small apartment of his own, in a building where the society bills are very high due to major maintenance work that is required.

Ram's Financials

His current annual income is ₹ 10.80 lakhs, that is ₹ 90,000 per month after taxes.

His family household monthly expenses are roughly ₹ 50,000 (including building maintenance expenses of ₹ 15,000 per month). He invests ₹ 35,000 per month and saves ₹ 5,000 per month. He expects his salary to grow at 10% per year. Sapna is a homemaker

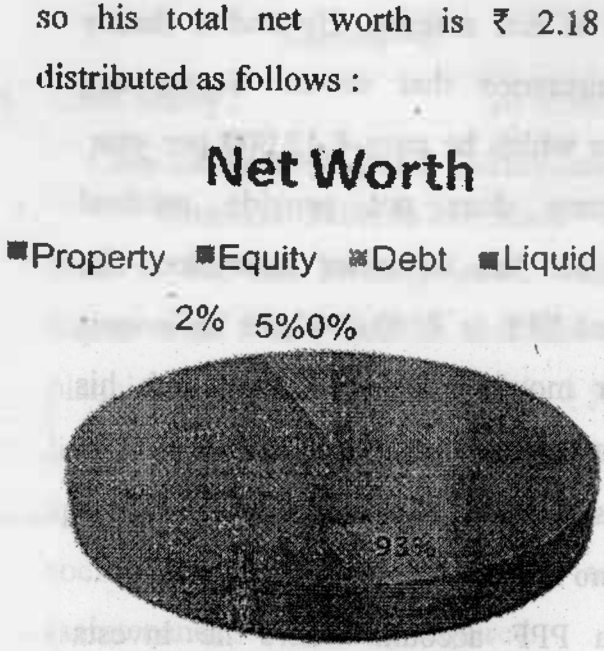
and hence is not earning. He had a family medical insurance that covers Sapna and himself, for which he pays ₹ 12,000 per year. His company does not provide medical insurance. He has no other insurance. His accumulated EPF is ₹ 40,000 and he invests ₹ 780 per month into his EPF, which his employer matches.

Ram's Assets and Liabilities

Ram has no liabilities

He has a PPF account where he invests ₹ 70,000 per year and wants to continue doing so. The current value in the account is ₹ 11 lakhs. Ram has equity mutual funds worth approximately ₹ 4.50 lakhs, and direct equity of ₹ 1.50 lakhs. He has liquid funds worth ₹ 75,000. Thus totally by the age of 30, Ram has accumulated ₹ 18.50 lakhs across debt, equity and liquid funds. He has no gold exposure. His residential home is worth 2 crore

so his total net worth is ₹ 2.18 crore, distributed as follows :



Ram's Life Goals

1. The first thing on Ram's mind is shifting to a bigger or even a same size apartment, in a better building. The value of his house currently is around ₹ 2.00 crore, and he knows that if he wants to move to a better location he will need to sell his current home and also spend an additional ₹ 50 lakhs to move into a ₹ 2.50 crore

apartment. This is something that Ram does not want to compromise on. He plans on taking a ₹ 50 lakh home loan but doesn't know if this is the best option for him, as he also wants to save for his retirement. He would like to do this immediately i.e. in 2012.

2. Ram wants to buy a new small car, worth say ₹ 4 lakhs. He doesn't mind a second-hand car. He can sell his existing vehicle and will get ₹ 1 lakh sale value. He would like to do this in 2012 as well.

3. Ram wants to provide for a medical contingeney corpus of ₹ 5 lakhs within 4 years i.e. by 2015.

4. Since his wife and he are planning a child in 3 years' time, he wants to spend ₹ 20 lakhs in today's terms on the child's higher education, to be achieved when the child turns 18 that is in 2032.

   (b) What are the requirements of successful industrial relations ?

   (c) Explain various parties involved in IR.

2. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks) (CO1, 2)

   (a) Explain the features of IR.

   (b) What are the causes of Industrial disputes ?

   (c) Explain the types of Industrial disputes.

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks) (CO2)

   (a) What are the methods to prevent the Industrial disputes in the organisation ?

   (b) What are the forms of Industrial disputes in India ?

(c) Explain the conditions to strikes, lock-out, layoff and retrenchment.

Section—B

4. **Case Study :** 20 Marks (CO2)

In a Multinational Company (MNC) the collective bargaining process was going on. The union puts up its demands to the management. But the management also had some issues to place before the unions. They said that they would consider the demands of the union only if the union is ready to make some compromise.

The MNC was catering to the markets of USA and Europe. At the same time they had 50% dependence on domestic market. But due to Global Financial Crisis, the rest 50% export orders were affected. From 50%, it has gone down to 10%, a reduction of 40%.

This is a grave situation indeed. The company may not survive only with the domestic market.

So, the management made a request to the Union that they are ready to listen to the demands of the union, only when they fulfil either of the following conditions :

- Reduce manpower by 20%
- Reduce wages to meet the slack in demand.

Questions :

(i) What should be response of the Union to such demands ?

(ii) Can you suggest some alternative and fruitful solution to this demand ?

(c) How do coordinated marketing mix elements help in building brand image ? Support your answer with an example.

(CO3, CO4)

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

(a) Discuss the concept of Positioning and its relevance. Cite a few examples for same.

(CO1, CO3, CO4)

(b) Discuss few important advertising appeals with examples, of advertising campaigns that were based on these appeals.

(CO3, CO4)

(c) What are campaign themes ? How are they important ? Cite some examples.

(CO2, CO3, CO4)

Section—B

4. **Case Study :** (20 Marks)

How Vodafone maintained brand relevance in a crisis

While many businesses halted their marketing efforts at the height of the UK's lockdowns, Vodafone took a different approach.

When many advertisers paused their marketing activity at the height of the UK's COVID-19 crisis, Vodafone took a different track. Drawing from the lessons of the 2008 financial crash, it realized that maintaining a brand voice during the crisis would be critical to its recovery.

At the same time, existing campaigns were no longer relevant. Vodafone's original and agile response to this problem saw it win the 2021 Marketing Week Masters award for Media and Telecoms.

Working with its agency Ogilvy, Vodafone drew on the new importance of connectivity. With millions forced to work remotely and kept at a distance from friends and family, the reliance on networks to keep them connected had never been more important. And so the Vodafone campaign, 'Keeping the UK Connected', was born.

At one level was an emotive celebration of the brand's role in maintaining this connectivity, with its 'Come Together' TV advert. On another, the team focused more on the practicalities of what people could do and how they could help. The Dreamlab initiative facilitated this, allowing people to give over their smartphone's unused processing power to help scientists develop treatments for the virus. The Great British Tech Appeal, meanwhile, encouraged people to donate old devices to children with no access.

One of the biggest successes of the campaign was its impact on driving up brand preference among non-users. Previously consideration of Vodafone among this non-user group had been stagnant at 22%, but following the campaign it rose by six percentage points to 28%. As a result, not only the campaign produced an immediate uplift in sales, but generated

positive sentiment more broadly, creating a halo effect around future campaigns.

Questions :

(i) How can campaigns be a brand's voice ? What goes into making campaigns more relevant ? (CO3, CO4, CO5, CO6)

(ii) Suggest a campaign or promotion strategy for Vodafone in similar setting, different from what has been mentioned in the given extract. (CO5, CO6)

   (c) Illustrate cycle view of supply chain.

3. Attempt any *two* parts of choice from (a), (b) and (c). (2×5=10 Marks)

   (a) Differentiate between inbound and outbound logistics with examples.

(b) Exemplify the subprocesses of supply chain process cycle.

(c) What are the various challenges which are encountered in achieving strategic fit for supply chain ?

Section—B

4. **Case Study :** 20 Marks

Amazon sells books, music and many other items over the Internet and is one of the pioneers of online consumer sales. Amazon, based in Seattle, Washington, started by filling all orders using books purchased from a distributor in response to customer orders. As it grew, the company added warehouses, allowing it to react more quickly to customer orders. In 2009, Amazon had about 20 warehouses in the United States and another 30 in the rest of the world. It uses the U.S. Postal Service and other package carriers such as UPS and FedEx to send products to

customers. Outbound shipping-related costs at Amazon in 2009 were almost $2 billion. With the Kindle, Amazon has worked hard to increase sales of digital books. As of 2009, Amazon offered more than 4,60,000 books in digital form. The company has also added a significant amount of audio and video content for sale in digital form. Amazon has continued to expand the set of products that it sells online. Besides books and music, Amazon has added many product categories such as toys, apparel, electronics, jewellery and shoes. In 2009, one of its largest acquisitions was Zappos, a leader in online shoe sales. This acquisition added a lot of product variety. According to the Amazon annual report, this required creating 1,21,000 product descriptions and uploading more than 2.2 million images to the Web site ! In 2010, another interesting acquisition by Amazon was diapers.com.

Unlike Zappos, this acquisition added little variety but considerable shipping volumes.

Questions :

(i) Why is Amazon building more warehouses as it grows ? How many warehouses should it have and where should they be located ?

(ii) What advantages does selling books via the Internet provide over a traditional bookstore ? Are there any disadvantages to selling via the Internet ?

Section—B

4. **Case Study :** (20 Marks) (CO2 & CO3)

You are working for a Sam Retail Company. Overall sales have been declining for the last three quarters and management is very much concerned. Each retail store has its own individual databases that keep track of sales for specific items. However at the overall management level, only sales figures for each

store are reported. Management has asked you to prepare reports by sale items (such as specific brand X and model Y of running shoes) and by categories of sale items (such as all running shoes) so that they can make accurate decisions on which product lines to drop to reduce overall inventory costs. As a BI specialist or as a part of a development team, you will need to develop a procedure to extract data from each individual database, reconcile data formats and types, aggregate all data into a data repository, and develop queries based on management requests. You will communicate and work closely with management representatives to ensure that the created data repository and reports meet their needs. Depending on your level of responsibilities, you will develop or contribute to the development of a realistic estimate of time, resources and cost to achieve the intended goal.

Once the project is launched, you will develop full specifications, develop and test subsystems, and integrate into final product. Throughout the development process, you will conduct a series of increasingly rigorous technical, functional and user tests. Based on the results of these tests, you can expect revision of technical specifications and overall system and unit design, along with project timeline, resources and cost revisions. Of particular importance will be a focus on user needs and requirements, business applications and easy-to-use user interface. Your BI team may be also invoked in developing and delivering training to managers and other stakeholders in using the new system.

Questions :

(i) Explain the procedure to extract data from each Database.

(ii) What role and responsibility does Business Intelligence Expert play in Management of Company ?

(iii) What all factors will lead to reduction of the inventory and other cost ?

(b) What are the various functions of trademarks ? (CO1)

(c) Discuss the salient features of the Geographical Indications Act, 1999.(CO2)

Section—B

4. **Case Study :** (CO1 and CO2)

After doing her M. Com. from 'Himachal Pradesh University of Shimla', Komal went back to her village in Kinnaur District of Himachal Pradesh. She wanted to contribute for the development of women of her village, so she formed an organization, the membership of which was open for all the women villagers on voluntary basis by paying ₹ 500 only which will be treated as their capital. Komal knew that the land of her village was suitable for the farming of medicinal plants. So she motivated the members of her organizations for growing medicinal plants in their fields under the guidance and help of the local agricultural department. It was also decided the organization will purchase the produce of each member and sell the same to drug manufacturing companies, at a very good price which was not possible for the members individually. The main objective of the organization is to render services to its

members rather than to earn profit. The computer training center for young boys and girls of the village was started under the guidance of Komal from the surplus of the profits.

Questions :

(a) Name the process that helped Komal in developing an ideal into an opportunity. 10

(b) Identify the kind of organization that was formed by Komal. 5

(c) State any *two* values which Komal wanted to communicate to the society. 5
