BUSINESS VALUATION

Time : Three Hours

Maximum Marks : 100

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each sub-question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) Define the concept of Business Valuation. What is the need of Valuation ? (CO1)

(b) Describe the scope and relevance of valuation in business with suitable examples. (CO2)

(c) What is the difference between market and book value of a company ? How is market value of a company being calculated ? (CO2)

P. T. O.

2. (a) Enumerate the steps involved in Valuation Process and its relevance in sound decision making with the reference to business. (CO3)

(b) What is appropriate discount rate to use in a levered DCF analysis ? Explain with suitable examples. (CO2)

(c) Enumerate major objectives of Business Valuation. (CO1)

3. (a) Discuss different valuation method. Which method is best in valuation of business and equity. (CO3)

(b) Indian P. Ltd. is a large medicine company having business at 50 different locations in India. The company intends to undertake expansion to provide value added and cost effective services to the market and participants dealing in medicine products including traders and companies. In context of above case : (CO3)

(i) How the decision to undertake funds to affect the capital requirements of its business ?

(ii) Name the major sources of finance the company may use for implementation of this plan and valuation methods for raising funds.

(c) List and explain the major sources of information for valuation of a company in changing business environment. (CO4)

4. (a) What is Relative Valuation ? How can you evaluate relative valuation when market prices are dynamic ? (CO3)

(b) How is DCF method being used in Relative Valuation ? Explain with suitable examples in different scenarios. (CO4)

(c) What are Options and how do they impact the Company Valuation ? (CO2)

Section—B

5. **Case Study :** (20 Marks) (CO4 & CO6)

XYZ Ltd. Company is a manufacturer of high-quality bicycles. The company has been in business for 10 years and has built up a loyal customer base. The owner of Company is considering selling the business and has hired a business valuation expert to determine the fair market value of the company. The expert performs a comprehensive analysis of the company's financial statements, market trends and industry benchmarks to arrive at a valuation. The expert determines that company has an annual revenue of $10 million and an EBITDA of $2 million. The expert then uses a multiple of 6x to value the company, which is consistent with industry benchmarks. This results in a valuation of $12 million.

However, the expert also considers other factors that may impact the value of the company. For example, the expert notes that the company has a strong brand name and a loyal customer base, which may be difficult for a competitor to replicate. Additionally, the company has a unique manufacturing process that has helped it produce high-quality bicycles at a lower cost than competitors.

Based on these additional factors, the expert decides to adjust the valuation upward by 10%, resulting in a final valuation of $13.2 million.

The owner of company is satisfied with the valuation and decides to proceed with the sale of the business. The final sale price is negotiated between the owner and the potential buyer and is set at $11.5 million, which is lower than the expert's valuation but still within a reasonable range.

Lib
3-6-2023

Overall, the business valuation expert was able to provide a comprehensive analysis of the company's financials and industry trends to arrive at a fair market value for the business. By considering additional factors such as the company's brand name and manufacturing process, the expert was able to provide a more nuanced valuation that better reflected the unique characteristics of the company.

Questions :

(a) How can Business/ Enterprise value be calculated using various methods ? (Considering above scenario).

(b) Relevance Capitalization rate (Discount Rate) in changing economic situations.

TRAINING AND DEVELOPMENT

Time : Three Hours

Maximum Marks : 100

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each sub-question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) What are the three phases in training process ? Explain the spiral model of the training process. (CO1, CO2)

(b) What is the role of need analysis in training ? Do you think that all training programmes are based on such analysis ? (CO4)

(c) Why is determining objectives critical to training ? What are the characteristics and components of a good objective ? (CO3)

P. T. O.

2. (a) Explain the phases that system model consists of organizing training and which are to be repeated on a regular basis to make further improvements. (CO2)

(b) In the changed economic scenario of the country, why has training assumed importance ? Elucidate. (CO3)

(c) What is the basis on which you would choose the training methods to best suit the different types of KSAs learning objectives ? Give suitable examples to support your answers. (CO3, CO4)

3. (a) Discuss with a suitable example how you would ensure transfer of knowledge to the workplace through training. (CO2, CO3)

(b) How is the management development program different from other training program ? Explain its scope and advantages. (CO4)

(c) How might an employee of your organization be motivated to attend a training program you are conducting ? (CO4)

4. (a) Several techniques of adult learning flow have been taken care of in the training system. What are those techniques ? (CO3)

(b) What are the recent trends that organizations face and how might these issues be overcome with training ? (CO3, CO4)

(c) Why is evaluation of a training program important ? How do you evaluate a training program with the Kirkpatrick Model ? (CO5)

Section—B

5. **Case Study :** (20 Marks) (CO5, CO6)

Jim worked as a laborer for a gas utility in Winnipeg, Manitoba. When the opportunity came to apply for a backhoe/front-end-loader operator job, he was excited. Three people applied. To select the one who would get the job, the company asked each of them to go out and actually work on the backhoe for a day. Jim felt his chance for the job disappear because he had never even driven a tractor, let alone used a backhoe. When he went out, he did not know how to start the tractor. One of the other backhoe operators had to show him. He managed through the day, and to his surprise, did better than the others. He was given the job.

On his first day at the new job, one of the other backhoe operators showed him where to check the hydraulic fluid and said, "These old Masseys are foolproof. You will be okay." Jim taught himself how to dig a hole by trial and error. He initially believed that the best way was to fill the bucket as much as possible before lifting it out of the hole and emptying it. He would wiggle the bucket back and forth until it was submerged and then curl it. When it came out of the hole, the earth would be falling off the sides. This job was not so difficult after all, he thought.

He cut through his first water line about two weeks after starting his new job. Going into a deep, muddy hole did not make the crew happy. After Jim cut through his third water line, the crew chief pulled him aside and said, "You are taking too much earth out with each bucket, so you don't feel the bucket hitting the water line; ease up a bit." Water lines were usually six to

eight feet down, so Jim would dig until about four feet and then try to be more careful. It was then that he pulled up some telephone lines that were only about three feet deep.

Realizing that more was involved in operating a backhoe than he first had thought, he sought out Bill Granger, who was known to have broken a water line only twice in his 15 years. It was said that he was so good that he could dig underneath the gas lines—a claim that Jim doubted. Bill said, "You need to be able to feel any restriction. The way to do that is to have more than one of your levers open at the same time. Operating the bucket lever and the boom lever at the same time reduces the power and causes the machine to stop rather than cut through a line of any type." Jim began to use this method but still broke water lines. The difference now was that he knew immediately when he broke a line. He could feel the extra pull, whereas in the past, he found out either by seeing water gushing up or by hearing the crew chief swearing at him. He was getting better.

Jim never did become as good as Bill Granger. In fact, two years later, he applied for another job as gas repairperson and was promoted, but the training as a gas repairperson was not much better.

Questions :

(a) What are the potential costs to this lack of training ? Why do you think the company operated in this manner ?

(b) What type of training would you recommend : OJT, classroom, or a combination ? Describe what the training might entail.

INTERNATIONAL MARKETING

Time : Three Hours

Maximum Marks : 100

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any ***two*** sub-questions among (a), (b) and (c) in each main question of Section A. Each sub-question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) Highlight various benefits to a company for undertaking International Marketing. (CO1)

   (b) What are various bases of segmenting international markets ? (CO2)

   (c) Critically examine relative advantages and disadvantages of alternative forms of international market entry strategies, with examples. (CO3)

2. (a) What are various components of international marketing environment, which a manager must continuously monitor ? Elaborate. (CO2)

   (b) Critically examine the direction and composition of exports from India in last decade, with examples. (CO3)

   (c) Explain various incentives available to Indian exporters, with special emphasis to PLI scheme. (CO4)

P. T. O.

Lib
12-6-23

3. (a) Outline the various steps involved in new product development and launch for international markets, with examples. (CO2)

   (b) What factors influencing selection of international distribution channel selection ? Highlight the functions performed by various international distribution intermediaries. (CO4)

   (c) Outline both Brownfield and Greenfield means of entering foreign markets. (CO3)

4. (a) What is country risk analysis ? What are the different types of risks ? (CO2)

   (b) "A crucial fact when doing business in a foreign country is that permission to conduct business is controlled by the government of the host country." Comment. (CO4)

   (c) Explain the reasoning behind the various regulations and restrictions imposed on the exportation and importation of goods. Briefly outline the Indian export and import policy. (CO5)

Section—B

5. **Case Study :** (20 Marks) (CO5, CO6)

Read the case and answer the questions based on it : A marketer of Cotton Shirts in India is planning to go international. He has hired your services as a consultant.

Questions :

(a) What environmental analysis he has to undertake to understand the overseas markets ?

(b) List the principal export documents he has to prepare to export the consignment.

BIGDATA ANALYTICS

Time : Three Hours

Maximum Marks : 100

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any ***two*** sub-questions among (a), (b) and (c) in each main question of Section A. Each sub-question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) Explain the Hadoop Distributed File System (HDFS) architecture and the role of Name Node and Data Node. (CO2)

(b) Describe the different Hadoop components and their functionalities. (CO1)

(c) Explain the significance of Hadoop's MapReduce framework in Big Data processing. (CO1)

P. T. O.

2. (a) Describe the process of data ingestion in Hadoop and the tools used for it. (CO2)

(b) Explain the process of data processing in Hadoop, including the Map and Reduce phases. (CO3)

(c) Discuss the challenges faced during data ingestion and processing in Hadoop. (CO5)

3. (a) Describe the role of Pig and Hive in Hadoop for data analysis and their differences. (CO1)

(b) Explain the concept of Big Data analytics and the tools used for it in Hadoop. (CO4)

(c) Discuss the process of data visualization in Hadoop and the tools used for it. (CO2, CO4)

4. (a) Explain the concept of Hadoop Ecosystem and the various components of it. (CO6)

(b) Discuss the significance of Hadoop in various industries and its use cases. (CO3)

(c) Describe the advantages and limitations of Hadoop for Big Data Analytics. (CO2)

Section—B

5. **Case Study :** (20 Marks) (CO6)

Take any case of your organizations and answer tje following questions based on understanding of Big Data :

(a) How do you join two tables in Hive ? Provide an example. What is the difference between an INNER JOIN and an OUTER JOIN in Hive ? Provide an example.

(b) Explain the difference between the following Hive queries :

(i) GROUP BY

(ii) ORDER BY

(iii) SORT BY

(iv) How do you optimize a hive query ? Provide at least *three* methods.

OPERATIONS STRATEGY

Time : Three Hours

Maximum Marks : 100

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each sub-question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) What is supply chain ? How does the supply chain of mobile phone work ? (CO1, CO2)

(b) Explain 5S methodology in detail. (CO1)

(c) Enlist the methods to collect voice of customers. Explain any *two* in detail. (CO1, CO2)

2. (a) What are the different types of waste in an organization ? Explain. (CO1)

(b) Define AQL, LTPD and explain OC curve in detail. (CO1, CO2)

(c) How is the single sampling plan executed ? Explain with the help of any *one* application. (CO2, CO3)
