MID SEMESTER EXAMINATION, NOV., 2021

MANAGMEMENT PROCESS AND ORGANIZATIONAL BEHAVIOUR

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains *two* Sections—Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) & (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) Explain the principles of Taylor's Scientific Management. (CO1)

(b) Ford Motor were producing cars at the speed of 10 seconds per car in the beginning. Which principles they were following that later became the baseline of assembly line in every area ? Explain this principle in brief. (CO4)

(c) Distinguish between Organic and Mechanistic structure. (CO2)

P. T. O.

110

2. (a) What are the various types of perceptual errors ? Explain any *one* with a suitable example. (CO2)

   (b) What is span of control ? (CO1)

   (c) What are the various determinants of perception ? (CO1)

3. (a) Players for a match are called team and not group. Discuss. (CO3)

   (b) What are the various components of attitude ? Discuss with example. (CO2)

   (c) What are the various dimensions of culture ? (CO2)

Section—B

4. **Case Study :** (CO4)

   You have recently joined an organization as an HR manager. On the very first day, you found that three persons Suresh, Ramesh and Sanjeev are late by 30 minutes, despite it being an important day where GM was to speak about the future goals of the organization. You don't want to take action on one ground only and want to consider all factors before taking action.

   Prepare/Create a model to discuss how you will take action against them.

MID SEMESTER EXAMINATION, NOV., 2021

MANAGERIAL ECONOMICS

Time : 1½ Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections—Sections A and B

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) & (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) Discuss the role/scope of Managerial Economics in internal issues of organization's decision-making and external issues of economy problem solving. (CO1)

(b) Explain the concept of GNP and GDP. What is the basic difference between these two and which one is more relevant in the modern economy ? (CO2)

(c) Explain the scope of ME in internal and external business issues. (CO2)

P. T. O.

153

2. (a) Explain the determinants of demand. What are the exception to law of demand ? (CO1)

(b) Differentiate between increase/decrease in demand and extension/contraction of demand, along with diagrams. (CO3)

(c) What are indifference curves ? Explain the properties of indifference curves with reasons in detail. (CO1)

3. (a) Do you think that price elasticity would be greater if computed for an industry or for one firm in the industry ? (CO3)

(b) Define Price Elasticity of Demand and explain its various types with examples. (CO1)

(c) Given the following demand schedule :

Price	Demand
₹ 10	30 units
₹ 15	20 units

Calculate the elasticity and represent it with a diagram. (CO3)

Section—B

4. **Case Study :** (20 Marks)

Read the following case study and answer the questions that follow :

The inclination towards setting up grocery stores and soft drinks outlets in petrol pumps is catching up in a big way in all cities in India. One such petrol pump with a soft drink outlet was located at a place where there were no other grocery stores with soft drink outlets within a radius of 5 km. During the summer of 2020, the owner of the outlet offered a discount of

10 percent and sales soared from 700 bottles per month to 1500 bottles per month. The discount was withdrawn subsequently.

Encouraged by the response, six months later, the owner decided to bring about a permanent reduction of 10 per cent in the price of soft drinks. In the mean time, two new grocery stores with soft drink outlets were set up in that place. This time the sales went up marginally from 700 bottles to 800 bottles per month and since a reduction in the price had already been announced, the owner could not revert to the old price soon. He could not reason out as to why the pricing strategy had failed.

Analyse the reason for the failure of pricing strategy using the following points :

(a) Price elasticity of demand during the summer of 2020. (CO2)

(b) The effect of these changed factors on the price elasticity and the resultant new price elasticity. (CO4)

(c) What do you mean by job analysis ? Explain its importance and process. (CO3)

Section—B

4. **Case Study :**

Mrs. Jancy works with TBL global services, IT project management company, in the HR department. Jancy is known for her involvement not only in her duties but also in other various activities of the department. She was aware of many minute details about the department throughout her tenure. Hence she becomes a point of contact for any such information which often consumes her time.

She is loaded with responsibilities very often, sometimes given to her and sometimes taken by her. In the beginning, she was happy with her profile and gave her the best in all the responsibilities with her. When years pass and she gets elevated to higher responsibilities she becomes overloaded. Still, she was happy with her job.

One fine day suddenly, she realized that many of her colleagues complete their work on time and also equally take care of their personal life. On the other hand, Jancy, having been loaded with responsibilities completed it partially at work and partially during her personal time. This becomes a reason for her stress.

She started questioning her ability to not being able to complete her work at the scheduled time. Later, she understood that apart from given responsibility she was involved in many other crucial activities of the department which becomes her additional responsibility which slowly the people forget that it is not under her job profile.

Jancy being highly disturbed started feeling her job as a burden. She thought she can't come out of this because the habit which she developed for herself and her coworkers is irreversible. So she finally decided to take a break from her job.

She fixed an appointment with the head HR, Mr. Ratan, for her resignation. He knows the fact that her involvement is irreplaceable and he also knew that she can be his competitor in a very short period, so, he had some other plans for her.

During the conversation, Ratan understood that Jancy is highly stubborn in leaving the job. So he convinced her to do work from home and advised her to limit her responsibilities as she will not come in any direct contact with the employees. Jancy happily accepted the option and she felt relaxed.

At the same time, Mr. Ratan was reporting to CEO Mr. Vedant "Sir, I didn't accept the resignation. I have given Jancy the option of work from home and she accepted to continue the job." Mr. Vedant asked, "But Ratan how did

you made her accept this offer. And why you have given this option. As per her colleagues, her nature of doing the job is a key component."

Mr. Ratan with a smile replied, "Sir I advised her to limit her responsibilities to her profile by opting for work from home. She accepted the offer. And I am very sure that her very nature of involvement will not allow her to restrict her responsibility even after opting for work from home." So I am not going to lose the benefit of her involvement.

Mr. Vedant was worried by the last words of Ratan, he thought. "How I am going to execute my plan of replacing Jancy in Ratan's position of head HR as she opted for work from home and why did Ratan has that option to her. Is this a planned show".

Questions :

(i) According to you what could be the reason for Jancy being overloaded ? Is it the fault of organizational structure or the nature of Jancy ? (CO3)

(ii) Answer the questions raised by Mr. Vedant in the last para. Was it a planned show ? (CO4)

BUSINESS ANALYTICS–I

Time : 1 : 30 Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) Define business analytics and its relevance with an example. (CO1, CO2, CO3)

(b) "Business analytics has its own challenges." Critically analyze the statement. (CO1, CO2, CO3)

(c) It is believed that data is the most critical component required for all kind of analytics. Suppose you're working on a novel problem and for that no prior data is available. In this scenario how would you proceed with the analytical process ? (CO1, CO2, CO3)

P. T. O.

2. (a) Explain various types of analytics. Give an example for each one. (CO1, CO2, CO3)

(b) In your opinion which type of analytics is most sought and relevant in present time ? Justify your opinion with a suitable example. (CO1, CO2, CO3)

(c) Considering all the data points in a population doesn't seem to be a good option at individual level but still government does it. What could be the possible reason for the same ? (CO1, CO2, CO3)

3. (a) What do you understand by hypothesis ? Explain its types. (CO1, CO2, CO3)

(b) Explain the process of hypothesis testing with an example. (CO1, CO2, CO3)

(c) Describe the differences between population and sample. (CO1, CO2, CO3)

Section—B

4. **Case Study :** (CO4, CO5, CO6)

Suppose you are running a consulting firm and one of your clients, a disease diagnostics company is in its early phase of aggressive growth. While new clients are being acquired and new partnerships are being forged rapidly, a pile of claim denials and receivables were accumulating in the background. With little insight into the nature of these denials and payment delays, their percentage collections are low and accounts receivables had hit an all-time high.

What solution you may provide to your client to recover from this situation ? Provide detailed justification for the proposed solution.
