MID SEMESTER EXAMINATION, Nov., 2021

MANAGEMENT PROCESS AND ORGANIZATIONAL BEHAVIOUR

Time : 1 : 30 Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any ***two*** sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) What is management ? Explain with the proper understanding of it. (CO2)

   (b) Discuss the levels of management and skills required suitably. (CO3)

   (c) Discuss why Neo-classical approach is significant in evolution of management thought. (CO2)

2. (a) Explain the purpose involved in organizing within an organization. (CO1)

   (b) Elaborate on Management by Objective. Also use an illustrative diagram. (CO3)

   (c) Briefly explain the various types of management plans. (CO2)

P. T. O.

3. (a) Elucidate the various techniques involved in decision making. (CO1)

(b) What factors need to be considered de-centralization, justify. (CO3)

(c) Bring out the difference in line and staff authority. (CO2)

Section—B

4. **Case Study :**

ABC Hardwares a nuts and bolts manufacturing company, was hugely popular amongst construction and furniture companies. Recorded history has it that their business was growing exponentially and soaring new heights for last 12 years that they were in business. No competitor could contest them in large volumes demand-supply, quality, and price. Year-on Year company was growing net profit by 15%. For year 2017-18 the Company's net profit was INR 15 crores.

However past 12 months record shows a complete somersault, a complete turn over. The company has not been able to match customer's demand and company objectives. Now, errors and defects have also started glaring. Wastage additionally is lurking as liability. The profit making company is now in a very dismal shape, needless to emphasize about it's shrinking profit margins for 2018-19 at INR 12 crores from expected INR 17.25 crores.

Managers are frantically collecting feedback from all stakeholders and trying to figure out what the problem exists and wondering what to do!! ?

(i) Which function of management is being discussed here ? Explain about it in detail. 10 marks (CO3)

(ii) What linkages would you establish between planning and the function involved in this case ? Explain. 10 marks (CO3)

50

MID SEMESTER EXAMINATION, Nov., 2021

MANAGERIAL ECONOMICS

Time : 1 : 30 Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) What is demand ? State the law of demand.

   (b) Distinguish between change in demand and shift in demand.

   (c) Explain Substitution effect with an example.

2. (a) What are the various types of elasticity of demand ?

P. T. O.

152

(b) The quantity demanded for a product at price ₹ 100 was 20 units. When the price was decreased to ₹ 80, the quantity demanded increased to 30 units. Calculate the price elasticity of demand.

(c) Write a short note on Marginal Rate of Substitution.

3. (a) What is meant by utility ? State the law of diminishing marginal utility.

(b) What are the determinants of demand ? Explain with suitable example.

(c) What are the characteristics of indifference curve ?

Section—B

4. **Case Study :**

In 1974, water was cheap. But, 1975 marked the beginning of one of the worst droughts in California's history. It's a semi-arid state with the gigantic agriculture industry dependent on water from its northern snow-pack and winter rains. But in the fall and winter of 1975, the relief of seasonal winter rains and snow did not come. Accustomed to "dry-spells", Californians showed little concern. But that winter wore on with no rain or snow, and soon what was great weather for some began to cause problems for others. The summer of '76 exploded into flames as over 1,400 fires swept the state. Marin County was particularly hard hit by the drought. It was one of the first areas forced to begin rationing water and people were penalized if they used more than their allotted amount. Rising to the challenge, Marin residents reduced their water consumption by 66%. As the drought continued, Marin County saw more and more evidence of just how valuable water was.

(3)

Besides being motivated to conserve, Marin residents were also willing to spend a lot more money... and make a long term commitment so they wouldn't be as vulnerable again. There were costly bond issues proving that people were willing to pay a high price for water, so they wouldn't have to deal with drought again. Torrential rains in the final days of 1977 marked the end of this drought. But six years later, with memories fading and plenty of water at hand, consumption slowly climbed back to where it had been.

Analyze the case in the light of Law of Diminishing Marginal Utility.

M. B. A. (AI & DS) (FIRST SEMESTER)

MID SEMESTER EXAMINATION, NOV., 2021

FUNDAMENTAL OF PROGRAMMING

Time : 1 : 30 Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) Explain an algorithm. What are some of its important features ? (CO1)

(b) For a program execution, do we require both complier and interpreter ? Justify your stand with a suitable example. (CO2)

(c) Convert below from decimal to binary : (CO1)

(i) 1000

(ii) 1010

P. T. O.

81

2. (a) Why is inheritance useful in programming ? Explain its possible types. (CO4)

   (b) Write the difference between the following : (CO4)

   (i) POP and OOP

   (ii) Generalization and Specialization

   (c) Write pseudo-code and draw a flowchart to check the number is positive, negative or zero. (CO5)

3. (a) "Every programming language has reserved words". What are they ? Give some examples. (CO3)

   (b) Write a short note on operators and its types. (CO1)

   (c) Write a program to find greatest of three numbers. (CO5)

Section—B

4. Design and implement a solution in C/Python for computing the net month salary of an employee based on the number of hours he worked using his respective per hour rate. If there is overtime, net salary is computed as salary plus overtime pay. Overtime pay is computed based on the number of hours' overtime and their respective overtime rate. Find required details below : (CO2 + CO5)

   (i) Employee Number of Days = 28 days (5 hours/day)

   (ii) Employee rate/hour(regular) = ₹ 1000/-

   (iii) Employee Number of Overtime Days = 4 days (2 hours/day)

   (iv) Employee rate/hour(overtime) = ₹ 500/-

MID SEMESTER EXAMINATION, NOV., 2021

MARKETING MANAGEMENT

Time : 1 : 30 Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any *two* sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) Define the STP refinement done by Tata Motors for its products in cars category. (CO1)

(b) Explain the concept of SBU. Support your answer with a suitable example where company became successful after introducing CBU. (CO1, CO2)

(c) Specify some external macro environmental forces affecting the marketing program of McDonalds. (CO4)

P. T. O.

2. (a) The famous book "World is Flat" mentions about ten forces flattening the world. Discuss how it has affected the field of marketing. (CO2)

   (b) Being a student of management, explain the changes you have observed in marketing strategies of organizations, post Covid 19. Give at least two examples where you have observed positive changes post Covid 19. (CO3)

   (c) "Value based marketing is an appeal to a customer's values and ethics", why should companies introduce this concept in their business ? (CO1, CO2)

3. (a) Explain BCG Matrix with the help of an example. (CO2, CO3)

   (b) Explain *two* examples of firms co-creating vale along with the customers. (CO2)

   (c) Explain the evolution of 4P's to 4C's and later to 4E's. (CO5)

Section—B

4. **Case Study :** (CO2, CO3)

   Write a case on AI based marketing business model of any Indian company. Explain how this company created a unique image.

M. B. A. (AI & DS) (FIRST SEMESTER)
MID SEMESTER EXAMINATION, NOV., 2021

FUNDAMENTAL OF AI FOR MANAGERS

Time : 1 : 30 Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any ***two*** sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) Discuss the five V's of Big Data. (CO3)

(b) Apply Z-score technique to find outlier in the following numbers : (CO3)

1, 2, 3, 4, 1, 15, 12, 2, 1, 2

(c) The marks scored in the AI subject are as follows : (CO3)

56, 67, 89, 98, 46, 64, 78, 82.

Find Q_1, Q_2 and Q_3.

P. T. O.

19

2. (a) Discuss any *two* methods to fill missing values. (CO4)

   (b) Apply IQR method to find the outlier in the following numbers : (CO4)

   10, 90, 150, 230, 500

   (c) Find the mean, median, mode and variance of {4, 2, 4, 3, 2, 2} (CO4)

3. (a) Define the following : (CO1)

   (i) Mean

   (ii) Median

   (iii) Mode

   (iv) Variance

   (v) Standard Deviation

   (b) Develop the Z-Score algorithm to find outlier. (CO1)

   (c) Discuss data transformation and data consistency. (CO1)

Section—B

4. There are two stocks A and B. Their share prices on particular days are given below. Apply Pearson's correlation and rank correlation coefficient formula to find the value of the correlation coefficient. (CO5)

Stock A (X)	Stock B (Y)
45	9
50	8
53	8
58	7
60	5

MID SEMESTER EXAMINATION, NOV., 2021

BUSINESS ANALYTICS

Time : 1 : 30 Hours

Maximum Marks : 50

Note : (i) This question paper contains two Sections–Section A and Section B.

(ii) Both Sections are compulsory.

(iii) Answer any ***two*** sub-questions among (a), (b) and (c) in each main question of Section A. Each question carries 10 marks.

(iv) Section B consisting of case study is compulsory. Section B is of 20 marks.

Section—A

1. (a) Explain the meaning of Business Analytics. What is the need of Business Analytics ? (CO1, CO4, CO2)

(b) Elucidate the importance of data. List the Real Life Applications of Data based decision strategies. (CO1, CO4, CO2)

(c) Define Machine learning and with examples, explain the use of ML in sentiment analysis. (CO1, CO4, CO2)

P. T. O.

14

2. (a) Describe the types of business analytics with examples. (CO1, CO4, CO6, CO2)

(b) With examples explain the use of business analytics in informed decision making. (CO1, CO4, CO6, CO2)

(c) Describe the role of mathematical modeling in data analytics and its use in business strategies. (CO1, CO4, CO6, CO2)

3. (a) Explain the difference between Data analytics and Business analytics. Support your answer with real world examples. (CO1, CO6)

(b) What are different dimensions of data ? With examples explain the need for deeper understanding of data dimensionality. (CO1, CO6)

(c) With examples illustrate the use of business analytics in the work of advertisements. (CO1, CO6)

Section—B

4. **Case Study :** (CO1, CO4, CO6)

Max Day stores which operate as a chain of discount department stores and grocery stores. During peak hours it is experiencing long lines at cash counters. The problem is noticeably worse on certain days like Saturday of a week and the peak periods during festivals and public holidays sometimes differ according to the day of the week. There are usually enough workers on the job to open all cash registers. The problem is when to call some of the workers who are stocking shelves, up to the front to work checkout counters.

- How might business analytics help the supermarket ?
- What data would be needed to facilitate good decisions and why ? Justify.
